# Dave Yost • Auditor of State

Board of Trustees  
Miami Valley Risk Management Association  
4625 Presidential Way  
Kettering, Ohio 45429

We have reviewed the *Independent Auditor's Report* of the Miami Valley Risk Management Association, Montgomery County, prepared by Julian & Grube, Inc., for the audit period January 1, 2017 through December 31, 2017. Based upon this review, we have accepted these reports in lieu of the audit required by Section 117.11, Revised Code. The Auditor of State did not audit the accompanying financial statements and, accordingly, we are unable to express, and do not express an opinion on them.

Our review was made in reference to the applicable sections of legislative criteria, as reflected by the Ohio Constitution, and the Revised Code, policies, procedures and guidelines of the Auditor of State, regulations and grant requirements. The Miami Valley Risk Management Association is responsible for compliance with these laws and regulations.

A handwritten signature in black ink that reads "Dave Yost".

Dave Yost  
Auditor of State

## **COMPREHENSIVE ANNUAL FINANCIAL REPORT**

### **YEAR ENDED DECEMBER 31, 2017**

Published June 18, 2018 Prepared  
by:  
Thomas L. Judy, Executive Director

**This page intentionally left blank.**

June 18, 2018

President Dina Minneci & the Board of Trustees  
Miami Valley Risk Management Association

**Re: MVRMA CAFR for the Period Ended December 31, 2017**

Dear MVRMA President and Members of the MVRMA Board of Trustees:

The Comprehensive Annual Financial Report of the Miami Valley Risk Management Association (MVRMA) for the year ended December 31, 2017 is hereby submitted for your review.

The purpose of this report is to provide complete and reliable information as a basis for making management decisions, as a means for determining compliance with legal requirements, as a means for determining funding adequacy including funding for losses and loss adjustment expense reserves and as a means for demonstrating responsible stewardship over the assets contributed by MVRMA's member cities.

MVRMA staff prepared all statements, schedules and other presentations in this report except the actuarial report included in the Required Supplemental Information (RSI) section. Management assumes full responsibility for the completeness and reliability of the information contained in this report, based upon a comprehensive framework of internal control that it has established for this purpose. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

Julian & Grube, Inc., Certified Public Accountants, have issued an unmodified ("clean") opinion on MVRMA's financial statements for the year ended December 31, 2017. The independent auditors' report is included in the front of the Financial Section, which immediately follows the Introductory Section of this report.

Management's Discussion and Analysis (MD&A) immediately follows the independent auditors' report and provides a narrative introduction, overview and analysis of the basic financial statements. The MD&A complements this letter of transmittal and should be read in conjunction with it.

4625 Presidential Way • Kettering, Ohio 45429  
(937) 438-8878 • Fax (937) 438-8330  
[www.mvrma.com](http://www.mvrma.com)

Following the Financial Section are the Statistical and Actuarial sections. The Statistical Section includes financial trends information, revenue capacity information, demographic and economic information and operating information for the last ten years. The Actuarial Section includes the independent actuary's opinion on the unpaid loss and loss adjustment expense reserves, including incurred but not reported (IBNR) claims and related exhibits.

### **Profile of the Reporting Entity**

MVRMA is a consortium of municipalities located in southwest Ohio which formed an Association under Section 2744.081 of the Ohio Revised Code (ORC) to act collectively in addressing its members' risk management and risk financing needs. It was incorporated on December 1, 1988, with six (6) charter members: the City of Beavercreek, City of Kettering, City of Miamisburg, City of Vandalia, City of West Carrollton and City of Wilmington. As of December 31, 2016, MVRMA had twenty (20) members, with the City of Troy joining in 1989, City of Montgomery joining in 1990, City of Springdale joining in 1991, City of Blue Ash and City of Wyoming joining in 1992, City of the Village of Indian Hill and City of Sidney joining in 1993, City of Madeira joining in 1994, City of Tipp City joining in 1996, City of Mason joining in 1997, City of Piqua joining in 2002 and the City of Englewood, City of Bellbrook and City of Centerville joining in 2004. The Association provides a combination of self-insurance, excess insurance and reinsurance for its members' property/casualty exposures; administers a claims/litigation management program; provides extensive safety/loss control consulting and training; and acts as a clearing house for risk-related information and financial reporting services for its members.

MVRMA management, under the direction of the Board of Trustees' Finance Committee, annually prepares a budget to provide for operating expenses and loss funding for the upcoming year. Funds available for the payment of claims are segregated by loss year, and claims are paid from the funds collected for the corresponding year of occurrence. Each year's loss funding contribution is determined by an actuarial study conducted by an independent actuary. Should any year's operating expenses or losses exceed that particular year's contributions, the Board of Trustees may transfer funds from the Association's Shock Loss Fund or call for supplementary payments from members, including withdrawn or expelled members, for the years of their membership.

### **Economic Condition and Outlook**

MVRMA is only indirectly affected by the state of the local economy; however, the Association's members are more directly impacted. Members are situated along or near the "I-75 Corridor" in the southwest quadrant of the state of Ohio and are within, or influenced by, the economies in the Cincinnati and Dayton regions. This region has a first-class transit infrastructure providing access to major markets from the Midwest to the east coast. Trucks have access to not only I-75, but also, I-70, I-71 and I-675. Two major airports, Cincinnati/Northern Kentucky International Airport and Dayton International Airport, can provide transport by air to 55% of the country's population in only 90 minutes. Additionally, this region is served by the CSX rail line which has access to all major cities and ports in the Midwest and along the east coast. Cargo shipping is also possible along the Ohio River, which borders the state to the south. Port Cincinnati sees 11.7 million tons of general and bulk cargo pass through annually.

### *Dayton Area*

The overall economic outlook for the Dayton region was described as a sense of optimism according to the Dayton Area Chamber of Commerce's Research Advisory Council (RAC). The Committee's 2017 Dayton Region Economic Outlook included the following:

- The Dayton region celebrated a lot of wins for new construction and expansion, including The Delco Lofts, a second location for Lock 27 Brewing and plans for a seven-story hotel, but housing experts noted real estate was a little tepid for the area.
- Employers in the region are still struggling to find qualified workers with a starting salary right around \$12/hour. However, RAC noted that manufacturing locations are a function of the best supply chain and given the success of the logistics industry, the committee notes the labor market should adjust and wages could increase.
- The Downtown Dayton center city has the largest number of residential units it has seen in decades and new storefronts housing small and independent business are doting the urban landscape.

The unemployment rate for the Dayton MSA was 4.2% for 2017 which is unchanged from 2016.

### *Cincinnati Area*

Cincinnati's economic indicators stated that Greater Cincinnati's economy is not slowing down according to the Regional Economic Development Initiative (REDI), and Berkshire Hathaway:

- Nonfarm job growth in metro Cincinnati continued to surpass the national growth rate, expanding by 2.4% during the 12-month period ending in August 2017.
- A demand for multifamily units exceeded new supply by 125% in Great Cincinnati, nearly balancing the trailing 12-month supply and demand totals, resulting in 95.8% metro-wide occupancy in September, the same as one-year prior.
- Upcoming infrastructure projects to I-71 MLK interchange that will create 700 acres for development are expected to yield a positive impact.

The unemployment rate for the Cincinnati was 3.8% for 2017 which is unchanged from 2016.

### **Insurance/Reinsurance Market Outlook**

MVRMA is impacted by the insurance and reinsurance markets due to the Association's purchase of excess insurance and reinsurance. The commercial insurance market had been generally very healthy as natural disaster losses had been below the average for the past decade. The 2017 hurricane season resulted in significant insurable losses to the industry. This following 2016, which had the highest insured CAT losses in the past 4-years. The devastating wildfires in the West are expected to eclipse \$10 billion in insured losses. Weather extremes, and a continued decrease in investment earnings, continue to be areas of concern for the industry. Looking ahead, the recent catastrophic losses are not expected to impact the casualty lines of coverage, however municipalities with urban law enforcement and jail exposures may experience price increases. Expectations are that property rates will firm. Buyers of property insurance should budget conservatively.

## **Long-term Financial Planning**

Having found what, it considers a successful formula for long-term financial planning, MVRMA continues to expand on previously developed programs while being mindful of any new opportunities:

- MVRMA's Shock Loss Fund, which was established as an internal funding mechanism to replace costly stop loss insurance, has surpassed its moving target of being equivalent to the current year's annual loss funding amount. The loss funding amount contributed in 2017 was \$2,350,000 while the Shock Loss Fund balance as of 12/31/17 was \$3,144,251. A recent actuarial study indicated this balance is sufficient at a confidence level in excess of 99% to satisfy the pool's claims liabilities under any feasible scenario.
- By participating in the insurance captive Government Entities Mutual (GEM), MVRMA has been able to further distance itself from the commercial market. GEM provides reinsurance for liability claims in excess of the pool's \$500,000 self-insured retention. GEM's limit of coverage was \$4.5 million in 2017.
- MVRMA modified its investment policy and approach in 2013 to increase its allocation in high-grade corporate bonds and to increase the duration of the portfolio to better match the Association's liabilities. This approach has created greater investment yield with minimal additional risk exposure. MVRMA continued to contract with SJS Investment Consulting, Inc. for investment advisory services in 2017. The investment portfolios continue to outperform established benchmarks.
- Pursuant to its policy of returning unused loss funds to its members when a loss year is closed. In 2017, MVRMA made refunds of \$1,519,932 to its members from the closure of Loss Year 23 (2011). No loss years were closed in 2016. In 2015, MVRMA made refunds of \$2,284,192 to its members from the closure of Loss Year 21 (2009) and Loss Year 22 (2010). In April of 2016 an additional refund of \$64,170 was made for Loss Year 22. MVRMA has refunded over \$16 million to its members since the Association's formation in 1988.

## **Relevant Financial Policies**

The Amended Agreement and Bylaws of MVRMA establish the basic fiscal requirements of the Association including: requiring Board approval of the preliminary budget by September 30 each year and the final budget by December 31; identifying the underwriting information used to establish each member's pool contribution factor; defining when supplementary payments shall be required and when and how surplus funds may be distributed to the membership.

MVRMA adopted its Cash and Investment Policy in 1991 to indicate a conscious, formal effort to develop, implement and monitor the investment of all MVRMA funds. It was last amended in March 2017 and is reviewed annually.

### **Major MVRMA Initiatives During 2017**

Among the Association's achievements during the fiscal period ending December 31, 2017 were the following:

- About 640 participants attended 34 MVRMA-sponsored training courses throughout the year.
- Completed reviews of all members per the standards of the pool's new Risk Management Best Practices program.

### **Awards**

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to MVRMA for its comprehensive annual financial report for the fiscal year ended December 31, 2016. This was the 24<sup>th</sup> consecutive year MVRMA has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our comprehensive annual financial report for the year ended December 31, 2017 continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

### **Acknowledgements**

Management would like to express appreciation to the Board of Trustees for their dedication to excellence in financial reporting, the principles of risk management, loss control and public entity pooling.

Respectfully submitted,

Thomas L. Judy, CPA  
Executive Director

## Independent Auditor's Report

Miami Valley Risk Management Association  
Montgomery County  
4625 Presidential Way  
Kettering, Ohio 45429

To the Board of Trustees:

### ***Report on the Financial Statements***

We have audited the accompanying financial statements of Miami Valley Risk Management Association (MVRMA), Montgomery County, Ohio, as of and for the year ended December 31, 2017, and the related notes to the financial statements, which collectively comprise the MVRMA's basic financial statements as listed in the table of contents.

### ***Management's Responsibility for the Financial Statements***

Management is responsible for preparing and fairly presenting these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes designing, implementing, and maintaining internal control relevant to preparing and fairly presenting financial statements that are free from material misstatement, whether due to fraud or error.

### ***Auditor's Responsibility***

Our responsibility is to opine on these financial statements based on our audit. We audited in accordance with auditing standards generally accepted in the United States of America and the financial audit standards in the Comptroller General of the United States' *Government Auditing Standards*. Those standards require us to plan and perform the audit to reasonably assure the financial statements are free from material misstatement.

An audit requires obtaining evidence about financial statement amounts and disclosures. The procedures selected depend on our judgment, including assessing the risks of material financial statement misstatement, whether due to fraud or error. In assessing those risks, we consider internal control relevant to the MVRMA's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not to the extent needed to opine on the effectiveness of the MVRMA's internal control. Accordingly, we express no opinion. An audit also includes evaluating the appropriateness of management's accounting policies and the reasonableness of their significant accounting estimates, as well as our evaluation of the overall financial statement presentation.

We believe the audit evidence we obtained is sufficient and appropriate to support our audit opinion.

### ***Opinion***

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of MVRMA, Montgomery County, Ohio, as of December 31, 2017, and the respective changes in financial position and, its cash flows for the year then ended in accordance with the accounting principles generally accepted in the United States of America.

Independent Auditor's Report  
Miami Valley Risk Management Association

***Other Matters***

***Required Supplementary Information***

Accounting principles generally accepted in the United States of America require this presentation to include *Management's discussion and analysis*, claims information, and schedules of net pension liability/net pension asset and pension contributions, listed in the table of contents, to supplement the basic financial statements. Although this information is not part of the basic financial statements, the Governmental Accounting Standards Board considers it essential for placing the basic financial statements in an appropriate operational, economic, or historical context. We applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, consisting of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, to the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not opine or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to opine or provide any other assurance.

***Other Information***

Our audit was conducted to opine on the MVRMA's basic financial statements taken as a whole.

The introductory section, the statistical section and the actuary report section information present additional analysis and are not a required part of the basic financial statements.

We did not subject the introductory section, the statistical section and the actuary report section information to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion or any other assurance on them.

***Other Reporting Required by Government Auditing Standards***

In accordance with *Government Auditing Standards*, we have also issued our report dated June 18, 2018, on our consideration of the MVRMA's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. That report describes the scope of our internal control testing over financial reporting and compliance, and the results of that testing, and does not opine on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the MVRMA's internal control over financial reporting and compliance.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

Management's Discussion And Analysis  
For The Year Ended December 31, 2017

---

The management of the Miami Valley Risk Management Association (MVRMA or Association) provides the following introduction, overview and analysis of MVRMA's financial statements for the year ended December 31, 2017. This discussion and analysis is designed to assist the reader in focusing on significant financial issues and activities and to identify any significant changes in financial position. We encourage the reader to consider the information presented here in conjunction with the basic financial statements taken as a whole.

MVRMA is a consortium of municipalities located in southwest Ohio, which formed an Association under Section 2744.081 of the Ohio Revised Code (ORC) to act collectively in addressing its members' risk management and risk financing needs. It became operational in December 1988 with six charter members and now has twenty members.

### **Basic Financial Statements and Presentation**

The financial statements presented by the Association are the Statement of Net Position, Statement of Revenues, Expenses, and Changes in Net Position and the Statement of Cash Flows. As required by Governmental Accounting Standards Board Statement Number 10, the Association is accounted for as one enterprise fund.

In 2015, the Association adopted GASB Statement 68, "Accounting and Financial Reporting for Pensions—an Amendment of GASB Statement 27," which significantly revises accounting for pension costs and liabilities. For reasons discussed below, many end users of this financial statement will gain a clearer understanding of the Association's actual financial condition by adding deferred inflows related to pension and the net pension liability to the reported net position and subtracting deferred outflows related to pension.

Governmental Accounting Standards Board standards are national and apply to all government financial reports prepared in accordance with generally accepted accounting principles. When accounting for pension costs, GASB 27 focused on a funding approach. This approach limited pension costs to contributions annually required by law, which may or may not be sufficient to fully fund each plan's *net pension liability*. GASB 68 takes an earnings approach to pension accounting; however, the nature of Ohio's statewide pension systems and state law governing those systems requires additional explanation in order to properly understand the information presented in these statements.

Under the new standards required by GASB 68, the net pension liability equals the Association's proportionate share of the plan's collective:

1. Present value of estimated future pension benefits attributable to active and inactive employees' past service
2. Minus plan assets available to pay these benefits

GASB notes that pension obligations, whether funded or unfunded, are part of the "employment exchange" – that is, the employee is trading his or her labor in exchange for wages, benefits, and the promise of a future pension. GASB noted that the unfunded portion of this pension promise is

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

Management's Discussion And Analysis  
For The Year Ended December 31, 2017

---

a present obligation of the government, part of a bargained-for benefit to the employee, and should accordingly be reported by the government as a liability since they received the benefit of the exchange. However, the Association is not responsible for certain key factors affecting the balance of this liability. In Ohio, the employee shares the obligation of funding pension benefits with the employer. Both employer and employee contribution rates are capped by State statute. A change in these caps requires action of both Houses of the General Assembly and approval of the Governor. Benefit provisions are also determined by State statute. The employee enters the employment exchange with the knowledge that the employer's promise is limited not by contract but by law. The employer enters the exchange also knowing that there is a specific, legal limit to its contribution to the pension system. In Ohio, there is no legal means to enforce the unfunded liability of the pension system *as against the public employer*. State law operates to mitigate/lessen the moral obligation of the public employer to the employee, because all parties enter the employment exchange with notice as to the law. The pension system is responsible for the administration of the plan.

Most long-term liabilities have set repayment schedules or, in the case of compensated absences (i.e. sick and vacation leave), are satisfied through paid time-off or termination payments. There is no repayment schedule for the net pension liability. As explained above, changes in pension benefits, contribution rates, and return on investments affect the balance of the net pension liability, but are outside the control of the local government. In the event that contributions, investment returns, and other changes are insufficient to keep up with required pension payments, State statute does not assign/identify the responsible party for the unfunded portion. Due to the unique nature of how the net pension liability is satisfied, this liability is separately identified within the long-term liability section of the statement of net position.

In accordance with GASB 68, the Association's statements prepared on an accrual basis of accounting include an annual pension expense for their proportionate share of each plan's *change* in net pension liability not accounted for as deferred inflows/outflows.

The tables presented in this Management's Discussion and Analysis provide a summary of the Association's financial position and results of operations for 2017 and 2016, respectively.

### **The Statement of Net Position**

This statement reports all of the Association's assets and liabilities as of December 31, 2017 categorized as current and non-current assets and liabilities. Assets consist mainly of cash and investments. Liabilities consist mainly of claims reserves and members' refunds payable. Reporting for GASB 68 has created two new categories: deferred outflows of resources and deferred inflows of resources. The balance of total assets and deferred outflows less total liabilities and deferred inflows is reported as "net position."

The table below presents a condensed summary information of the Association's net position as of December 31, 2017 compared to December 31, 2016.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

Management's Discussion And Analysis  
For The Year Ended December 31, 2017

---

Claims reserve is a liability for net unpaid losses, including incurred but not reported losses, and loss adjustment expenses. This amount is established annually with the assistance of an outside actuary. Claims liability is separated into current and noncurrent portions based upon a combination of an analysis of outstanding claims and historical experience. In 2017, claims reserves increased by \$629,000, or 20%, due to 2017 claims activity. This follows an increase of about \$415,000 and a decrease of \$852,000, in 2016 and 2015, respectively.

### **% Claims Reserves by Line of Business As of December 31**

<b>Line of Business</b>	<b>2017</b>	<b>2016</b>
Auto Liability	3%	3%
General Liability	91%	93%
Property	6%	4%

The liability for members' refunds reflects the funds being held in MVRMA's General Reserve Fund (GRF). The General Reserve Fund accounts for surplus funds returned, but not yet paid, to members from closed loss years. Once surplus funds are returned to the members, these funds are deposited in the GRF to the account of each individual member. Members may withdraw their GRF funds within 30 days after the closure of a loss year, or in January of each year, or for the payment of any MVRMA invoice at any time throughout the year. The members' refunds liability increased in 2017 due to the closure of a loss year and the members' choice to leave a portion of that amount in the GRF.

Net position is divided into two categories, net investment in capital assets and unrestricted. The net investment in capital assets represents the net book value of capital assets, while the remaining net position amount is unrestricted for future use by the Association. Net position invested in capital assets decreased from \$6,395 to \$2,839 during 2017 as there was no capital asset purchase activity during the year. Total net position decreased in 2017 by \$916,526, or 8.2%, primarily due to the closure of a loss year.

### **The Statement of Revenues, Expenses and Changes in Net Position**

This statement reflects the operating and non-operating revenue and expenses for the fiscal year and how the Association's net position changed during the year. As noted previously, MVRMA's net position decreased by 8.2% from 2016 to 2017.

**MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

Management's Discussion And Analysis  
For The Year Ended December 31, 2017

---

**Condensed Statement of Revenues, Expenses, and Changes in Net Position**

	<u>2017</u>	<u>2016</u>
Operating Revenue	<u>4,304,449</u>	<u>4,493,666</u>
 Operating Expenses:		
Incurred claims and claims adjustment expenses	1,984,627	1,890,342
Reinsurance premiums	947,406	864,407
Members' dividends	1,636,299	51,712
General and administrative expenses	<u>835,464</u>	<u>826,140</u>
 Total Operating Expenses	<u>5,403,796</u>	<u>3,632,601</u>
 Operating Income (Loss)	-1,099,347	861,065
 Nonoperating Revenue (Expense):		
Interest income and realized and unrealized gains (losses) on investments	182,821	-250,323
Other nonoperating revenue (expense)	<u>0</u>	<u>-304</u>
 Changes in Net Position	-916,526	610,438
Net position, beginning of year	<u>11,194,331</u>	<u>10,583,893</u>
Net position, end of year	<u>10,277,805</u>	<u>11,194,331</u>

Operating revenue consists primarily of members' contributions. The major categories of operating expenses are claims and claims adjustment expenses, reinsurance premiums, general and administrative expenses, and dividends to members. Non-operating revenue and expense is primarily related to investment activity.

Member contributions made up 94% of the Association's operating revenue in 2017 and 2016.

Members' contributions are tracked so that each year may be evaluated independently. When preparing its annual budget, MVRMA determines the total amount needed to fund its operations and collects the amount needed from members in proportion to their claims history and risk exposures. Each member's allocation is determined by dividing the sum of the following seven factors by 9:

1. The member's population as of the most recent census as a percentage of the total of all members' populations;

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

Management's Discussion And Analysis  
For The Year Ended December 31, 2017

---

2. The number of the member's sworn full-time police personnel as a percentage of the total of all members' full-time sworn police;
3. The number of the member's other full-time employees as a percentage of the total of all members' other full-time employees;
4. The number of the member's titled vehicles as a percentage of the total of all members' titled vehicles;
5. The member's insurable property values as a percentage of the total of all members' insurable property values;
6. The member's net operating expenses as a percentage of the total of all members' net operating expenses; and
7. The member's average annual adjusted losses for the last four years as the percentage of the total of all members' average annual adjusted losses for the last four years (weighted three times).

Changes in net position can vary widely from year to year. This variation is chiefly due to fluctuations in incurred claims expense and members' dividends. Although the incurred claims expense is subject to variability, it is moderated somewhat by the insuring of losses above the pool's self-insured retentions of \$500,000 per occurrence for liability claims and \$250,000 for property claims. Members' dividends expense is incurred when the Board of Trustees closes a loss year and refunds the residual assets in the loss year to the members. These amounts can be significant and do not necessarily occur each year.

### **The Statement of Cash Flows**

The Statement of Cash Flows allows readers of the financial statements to assess the Association's ability to generate sufficient cash flow to meet its obligations in a timely manner. Cash and equivalents decreased by \$415,130 in 2017 primarily due to investment activity.

	<b><u>2017</u></b>	<b><u>2016</u></b>
Cash flows from operating activities	(\$91,758)	\$148,178
Cash flows used in capital and related financing activities	0	(3,477)
Cash flows from (used in) investing activities	<u>(323,372)</u>	<u>(2,069,745)</u>
Net change in cash and cash equivalents	(415,130)	(1,925,044)
Cash and Cash Equivalents - Beginning of year	<u>1,216,966</u>	<u>3,142,010</u>
Cash and Cash Equivalents - End of year	<u><u>\$801,836</u></u>	<u><u>\$1,216,966</u></u>

Management's Discussion And Analysis  
For The Year Ended December 31, 2017

---

### **2018 Projects and Future Plans**

For 2018, the Association's liability limits of coverage will remain \$12 million per occurrence. The first layer of liability reinsurance coverage, purchased from Government Entities Mutual, a protected cell reinsurance captive domiciled in the District of Columbia, provides limits of \$4.5 million excess of the Association's self-insured retention of \$500,000. The next layer of reinsurance with General Reinsurance Corporation is \$7 million excess of \$5 million.

Property insurance for the period 7/1/17-7/1/18 was again placed with the Alliant Property Insurance Program (APIP). For the fourth consecutive year, MVRMA's premium rate decreased – by 2.3% for the current policy year – due to favorable market conditions and improving loss experience. At this time, MVRMA is preparing for its 7/1/18 renewal and is anticipating a small rate increase due to the impact of weather events upon the insurance market.

### **Contacting MVRMA**

This financial report is designed to provide members, creditors and investors with a general overview of MVRMA's finances and to show MVRMA's accountability for the monies it receives. If you have any questions about this report or need additional information, contact the Executive Director by writing 4625 Presidential Way, Kettering, OH 45429 or calling (937) 438-8878.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

---

#### **NOTE 1 – ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES**

Miami Valley Risk Management Association, Inc. (the “Association”) is an Ohio not-for-profit Corporation organized for the public purpose of enabling its member political subdivisions to obtain insurance coverage. It provides methods for paying claims, and provides a formalized, jointly administered self-insurance pool. In addition to the self-insurance pool, the Association provides risk management services, loss prevention programs, and other educational programs and materials. The members of the Association include the following cities and villages within the State of Ohio: Beavercreek, Bellbrook, Blue Ash, Centerville, Englewood, Kettering, Madeira, Mason, Miamisburg, Montgomery, Piqua, Sidney, Springdale, Tipp City, Troy, Vandalia, Indian Hill, West Carrollton, Wilmington and Wyoming.

**Basis of Accounting** – The Association follows the accrual basis of accounting as required for enterprise funds and is not legally required to adopt a budget. All transactions are accounted for in a single enterprise fund in accordance with Governmental Accounting Standards Board (GASB) Statement No. 62, *Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements*.

**Member and Supplemental Contributions** – The Association has classified its revenues as either operating or non-operating. Non-operating revenue primarily is the result of earning investment income. Member and supplemental contributions are recognized on the accrual basis and are recorded as revenue in the period earned. Member contributions are calculated and collected annually to produce a sum of money within the self-insurance pool adequate to fund administrative expenses and claims of the Association and to create adequate reserves for claims and unallocated loss adjustment expenses.

Under the terms of membership, should annual member contributions not be sufficient to fund ultimate losses, establish adequate reserves and cover administrative expenses, the Board of Trustees may require supplemental contributions. Supplemental contributions may be assessed during the entire life of the Association and any later period when claims or expenses, which are attributable to any membership year during which the event or claim occurred, need to be paid. Upon approval of the Board of Trustees, transfers from the Shock Loss Fund (“SLF”) (see note 6) may occur, in lieu of supplemental contributions. There were no supplemental contributions in 2017.

**Cash and cash equivalents** consist of deposits with financial institutions, and a State of Ohio depository institution, having an original maturity of 90 days or less.

**Claims deductibles** represent the first \$2,500 of any claim paid by the Association which is reimbursed by Association members.

**Investments** are stated at fair value. Realized gains and losses are determined on the identified cost basis.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

---

The Association's investment policy authorizes the Association to invest in the following:

- 1.) United States treasury bills, notes, bonds, or any other obligation or security issued by the United States treasury or any other obligation guaranteed as to principal and interest by the United States;
- 2.) Bonds, notes, debentures, or any other obligations or securities issued by any federal agency or instrumentality, including government sponsored enterprises. All federal agency securities shall be direct issuances of federal government agencies or instrumentalities;
- 3.) Deposits in eligible financial institutions;
- 4.) Bonds, notes, or other obligations of the State of Ohio and its political subdivisions;
- 5.) Investment grade corporate bonds (industrial, utility, or financial). Corporate bonds purchased shall be rated not lower than A2 by Moody's or A by S&P at the date of purchase;
- 6.) The State Treasury Asset Reserve of Ohio (STAR Ohio) or such successor investment pools operated or managed by the Treasurer of the State of Ohio; and
- 7.) No-load money market mutual funds consisting exclusively of obligations described in 1 or 2 above.

***Capital assets*** are carried at cost. Depreciation is provided on the straight-line basis at rates which are expected to amortize the costs of the assets over their estimated useful lives. The capitalization threshold is \$500. All major classes of depreciable assets have a useful life of five years, except audio-visual material which is three years.

***Claim Reserves and Unallocated Loss Adjustment Expenses*** – Provisions for claims reserves and claims adjustment expenses are based on information reported by members and are calculated by the Association's claims administrator and actuary. These amounts represent an estimate of reported, unpaid claims, plus a provision for claims incurred but not reported. The Association's management believes the estimate of the liability for claims reserves is reasonable and supported by valid actuarial calculations; however, actual incurred losses and loss adjustment expenses may not conform to the assumptions inherent in the determination of the liability. Accordingly, the ultimate settlement of losses and related loss adjustment expenses may vary from the estimated amounts included in the accompanying financial statements. Should the provision for claims reserves not be sufficient, supplemental contributions as discussed above may be assessed subsequent to Board approval.

***Member Credits*** – The bylaws of the Association provide that surplus operating funds may be used to credit future annual contributions at the discretion of the Board of Trustees. For the year ended December 31, 2017, member contributions are presented net of a credit of \$55,000.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

---

***Member Dividends*** – Dividends to members consist of refunds from closed loss years and refunds from the Shock Loss Fund. Closed loss year refunds were \$1,519,932 in 2017. Refunds are made to members from the Shock Loss Fund (see Note 6) to the extent the member's Shock Loss Fund balance exceeds its required balance by greater than forty percent. Such refunds were \$116,367 in 2017.

***Net Position*** – Net position represents the excess of revenues over expenses since inception. It is displayed in three components as follows:

Investment in capital assets consists of capital assets, net of accumulated depreciation.

Restricted consists of net position that is legally restricted by outside parties or by law through constitutional provisions or enabling legislation.

Unrestricted consists of net position that does not meet the definition of "restricted" or "net investment in capital assets."

As of December 31, 2017, the Association had no "restricted" net position. Under certain conditions, the Association may distribute, as member dividends, all or part of the net position to those members who constituted the self-insurance pool during the years when such surplus member funds were earned, provided that such members must also be members of the Association in the year in which said distribution is made.

In the event of termination of the Association, all members of the Association, past and present, are obligated for any necessary supplemental contributions attributable to the years during which they were members. After all claims and related expenses have been properly paid or reserves established for the payment of any such claims, any surplus member funds shall be distributed to members in proportion to their interest in such surplus member funds.

***Pensions*** – For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the pension plans and additions to and deductions from their fiduciary net position have been determined on the same basis as they are reported by the pension systems. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. The pension systems report investments at fair value.

***Income taxes*** – The Internal Revenue Service has ruled that premiums and investment income with respect to premium receipts are excluded from taxable income of the Association under Section 115 of the Internal Revenue Code of 1986. Therefore, the Association is not subject to tax.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

---

***Operating Revenues and Expenses*** – Operating revenues are those revenues that are generated directly from primary activities. For the Association, these revenues are member contributions and claims deductibles received from members. Operating expenses are the necessary costs incurred to provide the services that are the primary activity. All revenue and expenses not meeting these definitions are reported as non-operating.

***Use of Estimates*** – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

***Fair Value Measurements*** – The Association categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

***Prepaid Items*** – Prepaid Items represent expenses which have been paid, but not yet incurred under GAAP. These items are reported as an asset on the statement of net position.

***Deferred Inflows of Resources and Deferred Outflows of Resources*** – In addition to assets, the statement of net position will report a separate section for deferred outflows of resources. Deferred outflows of resources, represents a consumption of net position that applies to a future period and will not be recognized as an outflow of resources (expense) until then. For the Association, deferred outflows of resources have been reported for the following items related to the Association' net position asset/liability: (1) the net difference between projected and actual investment earnings on pension plan assets and (2) the Association's contributions to the pension systems subsequent to the measurement date. The deferred outflows of resources related to pension are further explained in Note 8.

In addition to liabilities, the statement of net position will report a separate section for deferred inflows of resources. Deferred inflows of resources represent an acquisition of net position that applies to a future period and will not be recognized as an inflow of resources (revenue) until that time. The Association reported deferred inflows of resources for (1) the difference between expected and actual experience and (2) the difference between employer's contributions and the employer's proportional share of contributions. These deferred inflows of resources related to pension is further explained in Note 8.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

---

#### **NOTE 2 – DEPOSITS AND INVESTMENTS**

##### ***Deposits as of December 31, 2017***

*Custodial Credit Risk* – Custodial credit risk with respect to bank deposits is the potential for loss of the Association’s deposits in the event of the failure of a depository financial institution. Protection of the Association’s cash and deposits is provided by the Federal Deposit Insurance Corporation.

At December 31, 2017, the carrying amount of the Association’s deposits was \$801,836. The bank balance was \$805,822, and of this amount, \$250,000 was insured by federal depository insurance. Based on the criteria described in GASB Statement No. 40, “Deposit and Investment Risk Disclosures”, \$555,822 of the Association’s bank balance was exposed to custodial risk.

##### ***Investments as of December 31, 2017***

At December 31, 2017, the Association had the following investments:

<u>Investment</u>	Measurement Value	Investment Maturities			
		Less than 6 months	6 mo. to 1 year	1 to 3 years	Greater than 3 years
FHLB	\$1,790,495			\$412,985	\$1,377,510
FFCB	1,795,633			1,795,633	
FHLMC	3,998,543	718,995	398,068	2,589,835	291,645
FNMA	854,809				854,809
Corporate Bonds	8,545,661	398,516	1,486,617	4,314,209	2,346,319
Government Entities					
Mutual, Inc. (see Note 6)	750,000				750,000
Total	<u>\$17,735,141</u>	<u>\$1,117,511</u>	<u>\$1,884,685</u>	<u>\$9,112,662</u>	<u>\$5,620,283</u>

*Note: For the purposes of disclosing interest rate risk of callable securities, the maturity date is the estimated call date.*

The Association’s investments in U.S. government money market mutual funds are valued using quoted market prices in active markets (Level 1 inputs). The Association’s investments in federal agency securities (FHLB, FFCB, FHLMC, FNMA) and corporate bonds are valued using quoted prices in markets that are not considered to be active, dealer quotations or alternative pricing sources for familiar assets or liabilities for which all significant inputs are observable, either directly or indirectly (Level 2 inputs).

*Interest Rate Risk* – Interest rate risk is the risk that the value of investments will decrease as a result of an increase in interest rates. To limit interest rate risk, the Association’s investment policy limits security purchases to those that mature within seven years of the settlement date.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

---

*Credit Risk* – Credit risk for holders of debt securities is the risk that the debtor will not be able to make its scheduled payments. The Association’s investments with the Federal Home Loan Mortgage Corporation, Federal Home Loan Bank, Federal National Mortgage Association and Federal Farm Credit Bank are rated AA+ by Standard & Poor’s. The Association’s investment in GEM is not rated. The Association’s investment policy requires corporate bonds, when purchased, to be rated not lower than A2 by Moody’s or A by Standard & Poor’s. As of 12/31/17, all corporate bonds held by the Association met or exceeded these benchmarks.

*Custodial Credit Risk* – For an investment, custodial credit risk is the risk that an investor might be unable to recover the value of an investment in the possession of an outside third party should the counterparty to the investment transaction fail. The Association’s investment in Government Entities Mutual is subject to custodial credit risk. The Association’s investments in debt securities of FHLB, FNMA, FHLMC, FFCB and the various corporate issuers are either registered in the Association’s name or held in pledge accounts of the custodial financial institutions and the underlying records of the custodial financial institutions support the Association’s claim to the investments; therefore, these investments are considered to be held in the Association’s name and are not subject to custodial credit risk. The Association’s investment policy does not specifically address credit risk beyond restricting the Association to invest only in securities authorized.

*Concentration of Credit Risk* – The Association’s investment policy states “no more than 25% of the total investment portfolio shall be invested with any one eligible financial institution as a time deposit at the time a deposit is made, exclusive of United States Treasury securities, all Federal Agency securities, and STAR Ohio.” Five percent or more of the Association’s investments were in the following at December 31, 2017:

<u>Investment</u>	<u>% as of 12/31/17</u>
Federal Home Loan Bank	10.1%
Federal Farm Credit Bank	10.1%
Federal Home Loan Mortgage Corporation	22.5%

Equipment	(25,671)	(3,018)	0	(\$28,689)
Leasehold Improvements	(12,281)	0	0	(\$12,281)
Office Furniture	(16,157)	(109)	1,134	(\$15,132)
Total Accumulated Depreciation	<u>(127,200)</u>	<u>(3,556)</u>	<u>4,208</u>	<u>(126,548)</u>
Total Capital Assets Being Depreciated, net	<u><u>\$6,395</u></u>	<u><u>(\$3,556)</u></u>	<u><u>\$0</u></u>	<u><u>\$2,839</u></u>

#### **NOTE 4 – NONCURRENT LIABILITIES**

Noncurrent liability activity for the year ended December 31, 2017 was as follows:

	<u>Beginning Balance</u>	<u>Additions</u>	<u>Reductions</u>	<u>Ending Balance</u>	<u>Current</u>
Net Pension Liability	<u>\$362,534</u>	<u>\$126,149</u>	<u>\$0</u>	<u>\$488,683</u>	<u>\$0</u>

#### **NOTE 5 – SELF-INSURED RETENTION**

The Association retains responsibility for the payment of claims within specified self-insured retention limits prior to the application of coverage provided by excess insurance and reinsurance contracts. The Association's per-occurrence retention limit for liability claims was \$500,000 in 2017. Property claims had an all-risk per-occurrence retention limit of \$250,000 for 2017. Boiler and machinery had a per occurrence retention limit from \$10,000 to \$350,000 depending upon boiler size. For every occurrence, the member was charged a deductible equal to the amount of the claim or \$2,500, whichever was less.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

---

#### **NOTE 6 – INSURANCE AND REINSURANCE CONTRACTS**

The Association maintains insurance and reinsurance contracts with insurance carriers who provide various limits of coverage over the Association's self-insured retention limits. Under the Association's bylaws, the Board of Trustees annually determines the types of insurance/reinsurance to purchase as well as appropriate limits. For the loss year ended December 31, 2017, the Association purchased the following types of insurance/reinsurance in excess of the Association's self-insured retention:

<b><u>Excess Insurance / Reinsurance</u></b>	<b><u>Limits of Coverage</u></b>
General liability (including law enforcement) per occurrence	\$9,500,000
Automobile liability per occurrence	\$9,500,000
Public official liability:	
Per occurrence	\$9,500,000
Per member annual aggregate	\$9,500,000
Employment practices liability:	
Per occurrence	\$9,500,000
Per member annual aggregate	\$9,500,000
Property (excluding flood and earthquake) per occurrence	\$1,000,000,000
Flood and earthquake property coverage – per occurrence and annual aggregate	\$25,000,000

In 2017, MVRMA reinsured its casualty program with Government Entities Mutual (a protected cell reinsurance captive domiciled in the District of Columbia) for \$4.5 million excess of MVRMA's \$500,000 self-insured retention and with General Reinsurance Corporation for \$7 million excess of \$5 million.

In 1996, the Association established a Shock Loss Fund (SLF) to replace the aggregate stop-loss policy. The Association's members contribute to the SLF based on a moving target equal to the annual loss fund. The Association's members annually fund approximately 15 percent of the moving target until the balance of the SLF is equivalent to the current year's annual loss fund. Once a member has at least the current year's regular loss fund contribution on account in the Association's SLF, it is not required to contribute additionally to the SLF. Any member whose balance falls below its targeted amount is required to contribute the amount needed to reach its targeted amount, or 15% of the current annual loss year contribution, whichever is less.

In the event that a series of losses or a single loss should exceed the amount of coverage provided by the self-insurance fund and insurance/reinsurance and any amount of supplemental payments for which members are obligated, then the payment of any uncovered loss is the obligation of the individual member or members against which the claims were made. In the unlikely event that all or any of the insurance companies are unable to meet their obligations under the excess insurance and reinsurance contracts, the Association and its members would be responsible for such defaulted amounts in accordance with the applicable policy terms and conditions.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

---

#### **NOTE 7 – CLAIMS RESERVE**

As discussed in Note 1, the Association establishes a claims reserve liability which includes both reported and unreported insured events and estimates of future payment of losses and related claims adjustment expenses. The changes in the aggregate liabilities for the Association are as follows:

	December 31 2017	December 31 2016
Unpaid claims and claim adjustment expenses - Beginning of Year	<u>\$3,113,308</u>	<u>\$2,698,181</u>
Incurred claims and claim adjustment expenses:		
Provision for insured events of the current year	1,860,931	1,205,338
Change in provision for insured events of prior years	(150,927)	415,661
Change in unallocated expense provision	<u>18,001</u>	<u>17,852</u>
Total incurred claims and claim adjustment expenses	<u>1,728,005</u>	<u>1,638,851</u>
Payments:		
Claims and claim adjustment expenses attributable to insured events of the current year	256,061	280,585
Claims and claim adjustment expenses attributable to insured events of prior years	842,944	943,139
Aggregate Adjustment		
Total Payments	<u>1,099,005</u>	<u>1,223,724</u>
Unpaid claims and claim adjustment expenses - End of Year	<u><u>\$3,742,308</u></u>	<u><u>\$3,113,308</u></u>

---

#### **NOTE 8 - PUBLIC EMPLOYEES RETIREMENT SYSTEM DEFINED BENEFIT PENSION PLAN**

##### ***Net Pension Liability/Asset***

The net pension liability/asset reported on the statement of net position represents a liability or asset to employees for pensions. Pensions are a component of exchange transactions—between an employer and its employees—of salaries and benefits for employee services. Pensions are provided to an employee—on a deferred-payment basis—as part of the total compensation package offered by an employer for employee services each financial period. The obligation to sacrifice resources for pensions is a present obligation because it was created as a result of employment exchanges that already have occurred.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

---

The net pension liability/asset represents the Association's proportionate share of each pension plan's collective actuarial present value of projected benefit payments attributable to past periods of service, net of each pension plan's fiduciary net position. The net pension liability/asset calculation is dependent on critical long-term variables, including estimated average life expectancies, earnings on investments, cost of living adjustments and others. While these estimates use the best information available, unknowable future events require adjusting this estimate annually.

The Ohio Revised Code limits the Association's obligation for this liability to annually required payments. The Association cannot control benefit terms or the manner in which pensions are financed; however, the Association does receive the benefit of employees' services in exchange for compensation including pension.

GASB 68 assumes any net pension liability is solely the obligation of the employer, because (1) they benefit from employee services; and (2) State statute requires all funding to come from these employers. All contributions to date have come solely from these employers (which also includes costs paid in the form of withholdings from employees). State statute requires the pension plans to amortize unfunded liabilities within 30 years. If the amortization period exceeds 30 years, each pension plan's board must propose corrective action to the State legislature. Any resulting legislative change to benefits or funding could significantly affect the net pension liability. Resulting adjustments to the net pension liability would be effective when the changes are legally enforceable.

The proportionate share of each plan's unfunded benefits or overfunded benefits is presented as a long-term *net pension liability* or *net pension asset*, respectively, on the accrual basis of accounting. Any liability for the contractually-required pension contribution outstanding at the end of the year is included in *accounts payable and accrued liabilities* on the accrual basis of accounting.

#### ***Plan Description – Ohio Public Employees Retirement System (OPERS)***

Plan Description - Association employees, other than full-time police and firefighters, participate in the Ohio Public Employees Retirement System (OPERS). OPERS administers three separate pension plans. The Traditional Pension Plan is a cost-sharing, multiple-employer defined benefit pension plan. The Member-Directed Plan is a defined contribution plan and the Combined Plan is a cost-sharing, multiple-employer defined benefit pension plan with defined contribution features. While members (e.g. Association employees) may elect the Member-Directed Plan and the Combined Plan, substantially all employee members are in OPERS' Traditional Pension Plan.

OPERS provides retirement, disability, survivor and death benefits, and annual cost of living adjustments to members of the Traditional Pension Plan. Authority to establish and amend benefits is provided by Chapter 145 of the Ohio Revised Code. OPERS issues a stand-alone financial report that includes financial statements, required supplementary information and detailed information about OPERS' fiduciary net position that may be obtained by visiting <https://www.opers.org/financial/reports.shtml>, by writing to the Ohio Public Employees

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

Retirement System, 277 East Town Street, Columbus, Ohio 43215-4642, or by calling 800-222-7377.

Senate Bill (SB) 343 was enacted into law with an effective date of January 7, 2013. In the legislation, members were categorized into three groups with varying provisions of the law applicable to each group. The following table provides age and service requirements for retirement and the retirement formula applied to final average salary (FAS) for the three member groups under the Traditional Pension Plan as per the reduced benefits adopted by SB 343 (see OPERS CAFR referenced above for additional information):

<b>Group A</b>	<b>Group B</b>	<b>Group C</b>
Eligible to retire prior to January 7, 2013 or five years after January 7, 2013	20 years of service credit prior to January 7, 2013 or eligible to retire ten years after January 7, 2013	Members not in other Groups and members hired on or after January 7, 2013
<b>State and Local</b>	<b>State and Local</b>	<b>State and Local</b>
<b>Age and Service Requirements:</b> Age 60 with 60 months of service credit or Age 55 with 25 years of service credit	<b>Age and Service Requirements:</b> Age 60 with 60 months of service credit or Age 55 with 25 years of service credit	<b>Age and Service Requirements:</b> Age 57 with 25 years of service credit or Age 62 with 5 years of service credit
<b>Formula:</b> 2.2% of FAS multiplied by years of service for the first 30 years and 2.5% for service years in excess of 30	<b>Formula:</b> 2.2% of FAS multiplied by years of service for the first 30 years and 2.5% for service years in excess of 30	<b>Formula:</b> 2.2% of FAS multiplied by years of service for the first 35 years and 2.5% for service years in excess of 35

Final Average Salary (FAS) represents the average of the three highest years of earnings over a member's career for Groups A and B. Group C is based on the average of the five highest years of earnings over a member's career.

Members who retire before meeting the age and years of service credit requirement for unreduced benefits receive a percentage reduction in the benefit amount.

When a benefit recipient has received benefits for 12 months, an annual cost of living adjustment (COLA) is provided. This COLA is calculated on the base retirement benefit at the date of retirement and is not compounded. For those retiring prior to January 7, 2013, the COLA will continue to be a 3.00% simple annual COLA. For those retiring subsequent to January 7, 2013, beginning in calendar year 2019, the COLA will be based on the average percentage increase in the Consumer Price Index, capped at 2.25%.

Benefits in the Combined Plan consist of both an age-and-service formula benefit (defined benefit) and a defined contribution element. The defined benefit element is calculated on the basis of age, FAS, and years of service. Eligibility regarding age and years of service in the Combined Plan is the same as the Traditional Pension Plan. The benefit formula for the defined benefit component of the plan for State and Local members in transition Groups A and B applies a factor of 1.0% to the member's FAS for the first 30 years of service.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

---

A factor of 1.25% is applied to years of service in excess of 30. The benefit formula for transition Group C applies a factor of 1.0% to the member's FAS and the first 35 years of service and a factor of 1.25% is applied to years in excess of 35. Persons retiring before age 65 with less than 30 years of service credit receive a percentage reduction in benefit. The defined contribution portion of the benefit is based on accumulated member contributions plus or minus any investment gains or losses on those contributions. Members retiring under the Combined Plan receive a 2.25% COLA adjustment on the defined benefit portion of their benefit.

Defined contribution plan benefits are established in the plan documents, which may be amended by the OPERS's Board of Trustees. Member-Directed Plan and Combined Plan members who have met the retirement eligibility requirements may apply for retirement benefits. The amount available for defined contribution benefits in the Combined Plan consists of the member's contributions plus or minus the investment gains or losses resulting from the member's investment selections. The amount available for defined contribution benefits in the Member-Directed Plan consists of the members' contributions, vested employer contributions and investment gains or losses resulting from the members' investment selections.

Employer contributions and associated investment earnings vest over a five-year period, at a rate of 20% each year. For additional information, see the Plan Statement in the OPERS CAFR.

Funding Policy - The Ohio Revised Code (ORC) provides statutory authority for member and employer contributions as follows:

	<u>State and Local</u>
<b>2017 Statutory Maximum Contribution Rates</b>	
Employer	14.0 %
Employee	10.0 %
<b>2017 Actual Contribution Rates</b>	
Employer:	
Pension	13.0 %
Post-employment Health Care Benefits	<u>1.0 %</u>
Total Employer	<u>14.0 %</u>
Employee	<u>10.0 %</u>

Employer contribution rates are actuarially determined and are expressed as a percentage of covered payroll.

The Association's contractually required contribution for the Traditional Pension Plan and the Member-Directed Plan was \$41,048 for 2017. Of this amount, \$1,791 is reported as *accounts payable and accrued liabilities*.

## MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.

### NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017

---

#### ***Pension Liabilities/Assets, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions***

---

The net pension liability and net pension asset for the OPERS Traditional Pension Plan and Combined Plan and Member-Directed Plan, respectively, were measured as of December 31, 2016, and the total pension liability or asset used to calculate the net pension liability or asset was determined by an actuarial valuation as of that date. The Association's proportion of the net pension liability or asset was based on the Association's share of contributions to the pension plan relative to the contributions of all participating entities.

Following is information related to the proportionate share and pension expense:

	OPERS - Traditional	OPERS - Member- Directed	Total
Proportion of the net pension liability prior measurement date	0.00209300%	0.01046800%	
Proportion of the net pension liability current measurement date	<u>0.00215200%</u>	<u>0.01105500%</u>	
Change in proportionate share	<u>0.00005900%</u>	<u>0.00058700%</u>	
Proportionate share of the net pension liability	\$ 488,683	\$ -	\$ 488,683
Proportionate share of the net pension asset	-	46	46
Pension expense	99,302	57	99,359

*(This space intentionally left blank)*

## MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.

### NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017

At December 31, 2017, the Association reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	OPERS - Traditional	OPERS - Member- Directed	OPERS - Directed	Total
<b>Deferred outflows of resources</b>				
Differences between expected and actual experience	\$ 662	\$ 469	\$ 1,131	
Net difference between projected and actual earnings on pension plan investments	72,776	39	72,815	
Changes of assumptions	77,511	52	77,563	
Changes in employer's proportionate percentage/ difference between employer contributions and proportionate share of contributions	3,695	-	3,695	
Association contributions subsequent to the measurement date	35,494	5,554	41,048	
Total deferred outflows of resources	<u><u>\$ 190,138</u></u>	<u><u>\$ 6,114</u></u>	<u><u>\$ 196,252</u></u>	
 <b>Deferred inflows of resources</b>				
Differences between expected and actual experience	2,908	-	2,908	
Changes in employer's proportionate percentage/ difference between employer contributions and proportionate share of contributions	12,193	-	12,193	
Total deferred inflows of resources	<u><u>\$ 15,101</u></u>	<u><u>\$ -</u></u>	<u><u>\$ 15,101</u></u>	

\$41,048 reported as deferred outflows of resources related to pension resulting from Association contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability/asset in the year ending December 31, 2018.

*(This space intentionally left blank)*

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pension will be recognized in pension expense as follows:

Year Ending December 31:	OPERS -		
	OPERS - Traditional	Member- Directed	Total
2018	\$ 52,353	\$ 82	\$ 52,435
2019	63,304	80	63,384
2020	26,020	79	26,099
2021	(2,133)	66	(2,067)
2022	(1)	67	66
Thereafter	-	186	186
Total	<u>\$ 139,543</u>	<u>\$ 560</u>	<u>\$ 140,103</u>

#### ***Actuarial Assumptions - OPERS***

Actuarial valuations of an ongoing plan involve estimates of the values of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and cost trends. Actuarially determined amounts are subject to continual review or modification as actual results are compared with past expectations and new estimates are made about the future.

*(This space intentionally left blank)*

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employers and plan members) and include the types of benefits provided at the time of each valuation. The total pension liability was determined by an actuarial valuation as of December 31, 2016, using the following actuarial assumptions, applied to all periods included in the measurement in accordance with the requirements of GASB 67. In 2016, the Board's actuarial consultants conducted an experience study for the period 2011 through 2015, comparing assumptions to actual results. The experience study incorporates both a historical review and forward-looking projections to determine the appropriate set of assumptions to keep the plan on a path toward full funding. Information from this study led to changes in both demographic and economic assumptions, with the most notable being a reduction in the actuarially assumed rate of return from 8.00% down to 7.50%, for the defined benefit investments, decreasing the wage inflation from 3.75% to 3.25% and changing the future salary increases from a range of 4.25% - 10.05% to 3.25% - 10.75%. Key methods and assumptions used in the latest actuarial valuation, reflecting experience study results, are presented below.

Wage inflation	3.25%
Future salary increases, including inflation	3.25% to 10.75% including wage inflation
COLA or ad hoc COLA	Pre 1/7/2013 retirees: 3.00%, simple Post 1/7/2013 retirees: 3.00%, simple through 2018, then 2.15% simple
Investment rate of return	7.50%
Actuarial cost method	Individual entry age

Mortality rates were based on the RP-2014 Healthy Annuitant Mortality Table. For males, Healthy Annuitant Mortality tables were used, adjusted for mortality improvement back to the observation base of 2006 and then established the base year as 2015. For females, Healthy Annuitant Mortality tables were used, adjusted for mortality improvement back to the observation base of 2006 and then established the base year as 2010. The mortality rates used in evaluating disability allowances were based on the RP-2014 Disabled mortality tables, adjusted for mortality improvement back to the observation base of 2006 and then established the base year as 2015 for males and 2010 for females. Mortality rates for a particular calendar year for both healthy and disabled retiree mortality tables are determined by applying the MP-2015 mortality improvement scale to the above-described tables.

The most recent experience study was completed for the five-year period ended December 31, 2015.

The long-term rate of return on defined benefit investment assets was determined using a building-block method in which best-estimate ranges of expected future real rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected real rate of return by weighting the expected future real rates of return by the target asset allocation percentage, adjusted for inflation.

## MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.

### NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017

OPERS manages investments in four investment portfolios: the Defined Benefits portfolio, the Health Care portfolio, the 401 (h) Health Care Trust portfolio, the 115 Health Care Trust portfolio and the Defined Contribution portfolio. The 401(h) Health Care Trust portfolio was closed as of June 30, 2016 and the net position transferred to the 115 Health Care Trust portfolio on July 1, 2016. The Defined Benefit portfolio contains the investment assets of the Traditional Pension Plan, the defined benefit component of the Combined Plan and the annuitized accounts of the Member-Directed Plan. The Defined Benefit portfolio historically included the assets of the Member-Directed retiree medical accounts funded through the VEBA Trust. However, the VEBA Trust was closed as of June 30, 2016 and the net position transferred to the 115 Health Care Trust portfolio on July 1, 2016. Within the Defined Benefit portfolio, contributions into the plans are all recorded at the same time, and benefit payments all occur on the first of the month. Accordingly, the money-weighted rate of return is considered to be the same for all plans within the portfolio. The annual money-weighted rate of return expressing investment performance, net of investment expenses and adjusted for the changing amounts actually invested, for the Defined Benefit portfolio is 8.3% for 2016.

The allocation of investment assets with the Defined Benefit portfolio is approved by the OPERS Board of Trustees as outlined in the annual investment plan. Plan assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the defined benefit pension plans. The table below displays the Board-approved asset allocation policy for 2016 and the long-term expected real rates of return:

Asset Class	Target Allocation	Weighted Average Long-Term Expected Real Rate of Return (Arithmetic)
Fixed income	23.00 %	2.75 %
Domestic equities	20.70	6.34
Real estate	10.00	4.75
Private equity	10.00	8.97
International equities	18.30	7.95
Other investments	18.00	4.92
Total	100.00 %	5.66 %

**Discount Rate** - The discount rate used to measure the total pension liability/asset was 7.50%, post-experience study results, for the Traditional Pension Plan, the Combined Plan and Member-Directed Plan. A discount rate of 8.00% was used in the previous measurement period. The projection of cash flows used to determine the discount rate assumed that contributions from plan members and those of the contributing employers are made at the contractually required rates, as actuarially determined. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefits payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments for the Traditional Pension Plan, Combined Plan and Member-Directed Plan was applied to all periods of projected benefit payments to determine the total pension liability.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

***Sensitivity of the Association's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate*** - The following table presents the Association's proportionate share of the net pension liability/asset calculated using the current period discount rate assumption of 7.50%, as well as what the Association's proportionate share of the net pension liability/asset would be if it were calculated using a discount rate that is one-percentage-point lower (6.50%) or one-percentage-point higher (8.50%) than the current rate:

	Current		
	1% Decrease (6.50%)	Discount Rate (7.50%)	1% Increase (8.50%)
Association's proportionate share of the net pension liability (asset):			
Traditional Pension Plan	\$ 746,572	\$ 488,683	\$ 273,777
Member-Directed Plan	111	(46)	(111)

### **NOTE 9 – POSTRETIREE BENEFIT PLAN**

#### **Ohio Public Employees Retirement System**

Plan Description - OPERS administers three separate pension plans: The Traditional Pension Plan—a cost-sharing, multiple-employer defined benefit pension plan; the Member Directed Plan—a defined contribution plan; and the Combined Plan—a cost-sharing, multiple-employer defined benefit pension plan that has elements of both a defined benefit and defined contribution plan.

OPERS maintains a cost-sharing, multiple-employer defined benefit post-employment health care trust, which funds multiple health care plans including medical coverage, prescription drug coverage and deposits to a Health Reimbursement Arrangement to qualifying benefit recipients of both the Traditional Pension and the Combined plans. This trust is also used to fund health care for Member Directed Plan participants, in the form of a Retiree Medical Account (RMA). At retirement or refund, Member-Directed Plan participants may be eligible for reimbursement of qualified medical expenses from their vested RMA balance.

In order to qualify for health care coverage, age-and-service retirees under the Traditional Pension and Combined plans must have 20 or more years of qualifying Ohio service credit. Health care coverage for disability benefit recipients and qualified survivor benefit recipients is available. The health care coverage provided by OPERS meets the definition of an Other Post Employment Benefit (OPEB) as described in GASB Statement 45. Please see the Plan Statement in the OPERS 2016 CAFR for details.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

---

The Ohio Revised Code permits, but does not require, OPERS to provide health care to its eligible benefit recipients. Authority to establish and amend health care coverage is provided to the OPERS Board of Trustees (OPERS Board) in Chapter 145 of the Ohio Revised Code.

Disclosures for the healthcare plan are presented separately in the OPERS financial report which may be obtained by visiting <https://www.opers.org/financial/reports.shtml>, writing to OPERS, 277 East Town Street, Columbus, OH 43215-4642 or by calling (800) 222-7377.

**Funding Policy** - The post-employment healthcare plan was established under, and is administered in accordance with, Internal Revenue Code Section 401(h). State statute requires that public employers fund post-employment healthcare through contributions to OPERS. A portion of each employer's contribution to the Traditional or Combined Plans is set aside for the funding of post-employment health care.

Employer contribution rates are expressed as a percentage of the covered payroll of active employees. In 2017, local government employers contributed 14.00% of covered payroll. Each year the OPERS' Retirement Board determines the portion of the employer contribution rate that will be set aside for the funding of the postemployment health care benefits. The portion of employer contributions allocated to fund post-employment healthcare for members in the Traditional Plan and Combined Plan for 2017 was 1.00%.

The OPERS Retirement Board is also authorized to establish rules for the payment of a portion of the health care benefits provided, by the retiree or their surviving beneficiaries. Payment amounts vary depending on the number of covered dependents and the coverage selected. Active members do not make contributions to the post-employment healthcare plan.

The Association's contributions allocated to fund post-employment health care benefits for the years ended December 31, 2017, 2016, and 2015 were \$4,951, \$7,913, and \$6,157, respectively; 96.11% has been contributed for 2017 and 100% has been contributed for 2016 and 2015. The remaining 2017 post-employment health care benefits liability has been reported as accounts payable and accrued liabilities on the basic financial statements.

Changes to the health care plan were adopted by the OPERS Board of Trustees on September 19, 2012, with a transition plan commencing January 1, 2014. With the recent passage of pension legislation under State Bill 343 and the approved health care changes, OPERS expects to be able to consistently allocate 4.00% of the employer contributions toward the health care fund after the end of the transition period.

## **MIAMI VALLEY RISK MANAGEMENT ASSOCIATION, INC.**

### **NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2017**

---

#### **NOTE 10 – COMMITMENTS**

***Leases*** - The Association leases office space under a lease which was renewed for five years effective July 1, 2014. Rental expense for the lease was \$36,400 in 2017. Future minimum annual lease payments are \$36,400 through June 30, 2019. An option to purchase the building was also included in the agreement. MVRMA may purchase the building for \$320,000 at any time during the lease term.

#### **NOTE 11 – LITIGATION AND CLAIMS**

The Association is party to various legal proceedings, which normally occur in the course of claims processing operations. Management believes that the outcome of such claims has been adequately accrued in the claims reserve liability, and excess will be covered by insurance carriers that provide excess insurance and reinsurance contracts. Nevertheless, due to uncertainties in the settlement process, it is at least reasonably possible that management's view of the outcome could change materially in the near term.

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION  
FOR THE YEAR ENDED DECEMBER 31, 2017

*OHIO PUBLIC EMPLOYEES RETIREMENT SYSTEM (OPERS)*

*Changes in benefit terms* : There were no changes in benefit terms from the amounts reported for 2014-2017.

*Changes in assumptions* : There were no changes in methods and assumptions used in the calculation of actuarial determined contributions for 2014-2016. For 2017, the following were the most significant changes of assumptions that affected the total pension liability since the prior measurement date: (a) reduction in the actuarially assumed rate of return from 8.00% down to 7.50%, (b) for defined benefit investments, decreasing the wage inflation from 3.75% to 3.25% and (c) changing the future salary increases from a range of 4.25%-10.05% to 3.25%-10.75%.

**Notes:**

1. The data is as of 8/31/16 unless otherwise noted.
2. "Avg. Annual Adjusted Losses" are calculated by averaging each member's losses for the years 2012, 2013, 2014 & 2015. Losses are adjusted in accordance with MVRMA's Loss Capping Policy and include both paid claims and open claim reserves. Loss data is as of August 21, 2016.
3. Annually, all buildings valued in excess of \$50K, that were constructed or acquired since the previous year's on-site appraisal, are appraised.
4. "NOE" are calculated based upon each members' audited financial statements for the fiscal year most recently concluded. The amount has been
5. A member's PCF value is determined by applying the following formula to the member's percentage share of each of the factors in the above table:  

$$(3 \times \%AAAL) + (\%Population + \%FT Police + \%Other FT + \%Titled Vehicles + \%IRPRV + \%NOE)$$

Membership Year	Risk Exposure							Pool Contribution Factors	
	(Non-Police)

Note: In 2007, NAWA, a joint venture water authority shared by the cities of Tipp City and Vandalia, was included as a separate entity when co-factors were calculated for each member of the pool. Calculating a separate contribution factor for NAWA was simply a means of separating it from the cities of Tipp City and Vandalia. The 2007-2010 totals above include the following information submitted for NAWA:

NAWA - 2008	\$0	0	3	0	1	\$11,946,350	\$537,839	0.19%
NAWA - 2009	\$8,750	0	3	0	1	\$12,300,907	\$819,802	0.61%
NAWA - 2010	\$8,750	0	3	0	1	\$12,601,281	\$862,624	0.54%
NAWA - 2011	\$8,750	0	4	0	1	\$12,384,113	\$1,060,718	0.57%
NAWA - 2012	\$8,750	0	4	0	1	\$13,103,413	\$897,199	0.61%
NAWA - 2013	\$0	0	4	0	1	\$13,512,950	\$922,993	0.19%
NAWA - 2014	\$2,166	0	4	0	1	\$13,010,810	\$976,491	0.29%

**Re: Analysis of Unpaid Loss and LAE as of December 31, 2017**

Dear Mr. Judy:

Attached is Pinnacle Actuarial Resources, Inc.'s (Pinnacle's) draft report on the unpaid loss and loss adjustment expense (LAE) amounts of Miami Valley Risk Management Association (MVRMA) as of December 31, 2017.

This draft report is intended for discussion purposes only, and should not be relied upon by MVRMA or referenced or distributed to third parties without Pinnacle's express written consent. We look forward to the opportunity to discuss our analysis and findings with you and will issue a final report shortly thereafter, which will replace this draft.

Attention is called to the section of the report entitled *Distribution*, which sets out the limits on distribution of the report.

We have prepared this report so that MVRMA may comply with requirements of the state of Ohio concerning the need for a written actuarial report. A copy of this report should be retained in MVRMA's offices for a seven-year period in support of the loss reserves that will be contained in the 2017 financial statement. The report should be made available for insurance regulatory examination, upon request.

This report contains workpapers, trade secrets, and confidential information of both MVRMA and Pinnacle, and as such, it is not intended to be subject to disclosure requirements under any Freedom of Information Act or similar laws.

The authors of this report are members of the American Academy of Actuaries and meet its qualification standards to render the actuarial opinion contained herein.

---

We have enjoyed working with you in the preparation of this report. Please let us know if you have any questions.

Very truly yours,

*Timothy C. Mosler*

## *Analysis of Unpaid Loss and LAE as of December 31, 2017*

### **PURPOSE AND SCOPE**

Pinnacle Actuarial Resources, Inc. (Pinnacle) was retained by Miami Valley Risk Management Association (MVRMA) to prepare an actuarial analysis of MVRMA's loss and loss adjustment expense (LAE) experience for the purpose of developing estimates of unpaid loss and LAE as of December 31, 2017.

This report was prepared for the internal use of MVRMA management to present our findings with respect to this analysis. It is our understanding that MVRMA management will consider our findings for the purposes of establishing liability estimates for external financial reporting and internal management reporting.

Our report is not intended or necessarily suitable for any other purpose.

In this report, we develop an actuarial central estimate of MVRMA's unpaid loss and LAE as of December 31, 2017. This actuarial central estimate is intended to represent an expected value over a range of reasonably foreseeable outcomes. The actuarial central estimate was arrived at through evaluation of the results of various actuarial methods and models applied to MVRMA's experience. As such, the derivation of this estimate does not reflect extreme events believed to have a remote possibility of occurring. We consider the actuarial central estimate suitable for use in financial reporting contexts.

The exhibits attached in support of our conclusions are an integral part of this report. This section has been prepared so that our actuarial assumptions and judgments are documented. Judgments about the analysis and findings presented in this report should be made only after considering the report in its entirety. Our projections are predicated on a number of assumptions as to future conditions and events. These assumptions are documented in subsequent sections of this report, and should be understood in order to place the actuarial estimates in their appropriate context. In addition, these projections are subject to a number of reliances and limitations, as described in subsequent sections of this report.

We are available to answer any questions that may arise regarding this report. We assume that the user of this report will seek such explanation on any matter in question.

The scope does not include quantification of the uncertainty in our estimates. However, our report includes commentary on this uncertainty to assist in understanding the financial implications of our results.

For the purposes of our report, the "accounting date" of December 31, 2017 is the date used to separate paid and unpaid claim amounts in MVRMA's financial statement. Transactions through the "valuation date" of December 31, 2017 are included in the data used in our analysis. No account has been taken in the projections of developments subsequent to the "review date" of March 15, 2018.

Paid losses provided to us are net of salvage and subrogation. Therefore loss reserve estimates derived from this data would implicitly anticipate salvage and subrogation. The other recoverables considered in our reserve estimates are individual member liabilities and excess insurance.

All loss and LAE amounts are stated on an undiscounted basis as regards future investment income.

**Miami Valley Risk Management Association**  
*Analysis of Unpaid Loss and LAE as of December 31, 2017*

Throughout this report, the use of the term *loss* without modification includes loss and allocated loss adjustment expenses (ALAE), but does not include unallocated loss adjustment expenses (ULAE).

This actuarial report is being provided to MVRMA to be retained for a period of seven years in its administrative offices and to be available for examination by its members and for regulatory examination, if appropriate.

Loss adjustment expenses include but are not limited to the costs of administering, determining coverage for, settling, or defending claims even if it is ultimately determined that the claim is invalid.

Funding for MVRMA's loss and LAE is accomplished via annually budgeted contributions. In the event the pool requires additional funds, such amounts can be obtained via a call for special assessments by MVRMA's Board of Trustees for supplementary payments.

**Miami Valley Risk Management Association**  
*Analysis of Unpaid Loss and LAE as of December 31, 2017*

**DISTRIBUTION**

Our report is delivered under the following terms and conditions:

- This report is provided to MVRMA solely for the intended purpose, and may not be referenced or distributed to any other party without our prior written consent
- This report has been prepared for use by persons technically competent in the areas covered and with the necessary background information
- Draft versions of this report must not be relied upon by any person for any purpose
- This report is available for regulatory examination
- A copy of this report may be shared with MVRMA's independent auditors solely in the context of their performing regular audit activities

We accept no responsibility for any consequences arising from any third party relying on this report. If we agree to provide this report to a third party, you are responsible for ensuring that the report is provided in its entirety, that the third party is made aware of the fact that they are not entitled to rely upon it, and that they may not distribute the report to any other party.

This report contains workpapers, trade secrets, and confidential information of both MVRMA and Pinnacle. Because of the nature of the material contained in the report, it is not intended to be subject to disclosure requirements under any Freedom of Information Act or similar laws.

# Miami Valley Risk Management Association

## *Analysis of Unpaid Loss and LAE as of December 31, 2017*

### **BACKGROUND**

MVRMA has provided insurance coverage for its members since December 1, 1988. As of December 31, 2017 the pool was comprised of the following 20 entities: Beavercreek, Bellbrook, Blue Ash, Centerville, Englewood, Kettering, Madeira, Mason, Miamisburg, Montgomery, Piqua, Sidney, Springdale, Tipp City, Troy, Vandalia, the Village of Indian Hill, West Carrollton, Wilmington and Wyoming. MVRMA provides coverage for several lines of insurance including commercial property, comprehensive general liability, automobile liability, automobile physical damage, law enforcement liability, public official's liability, crime, ambulance attendants, and boiler and machinery.

This report groups all losses into three categories: automobile liability (AL), general liability (GL), and property which includes auto physical damage (Property). Each line is analyzed for annual periods December 1, 1988 through December 31, 2017. The results of the report are not intended to apply to any other entities, lines of insurance, or periods.

Prior to December 31, 1994, claim adjustment services were provided to MVRMA through Gallagher Bassett Insurance Services, Incorporated. Gallagher Bassett continued to adjust run-off claims for the period December 1, 1988 through December 31, 1994. As of December 31, 2008, there were no outstanding claims from this claim period. Effective January 1, 1995, MVRMA began to employ an in-house claims staff.

### **Data**

We were provided with "gross" paid and incurred loss and ALAE by accident period, by line of business. The term "gross" means before consideration of recoverables from excess carriers and member deductibles. Paid losses are net of salvage and subrogation.

Detailed claims data was provided to us by MVRMA's claims department for accident periods 2010 through 2017. MVRMA also provided summaries by line of business for accident periods 2010 through 2017. There has been no claim activity for any prior accident periods. Excess insurance limits were provided by MVRMA.

In my review, we have relied on listings and other relevant data, prepared by Tom Judy, Executive Director of MVRMA and Craig Blair, Claims Manager of MVRMA. We evaluated that data for reasonableness and consistency. We are relying on the audit procedures of MVRMA's independent public accountant and claims auditor to verify the accuracy of the data underlying our analysis. If the underlying data or information is inaccurate or incomplete, the results of our analysis may likewise be inaccurate or incomplete.

**Miami Valley Risk Management Association**  
*Analysis of Unpaid Loss and LAE as of December 31, 2017*

**Self-Insured Retention History**

The following table details the MVRMA self-insured retention (SIR) per occurrence for casualty and property coverages separately by accident year.

Accident Year	Casualty - SIR	Property - SIR
1993 & Prior	\$250,000	\$250,000
1994	\$250,000	\$100,000
1995	\$250,000	\$150,000
1996	\$250,000	\$250,000
1997-1998	\$500,000	\$250,000
1999-2001	\$500,000	\$150,000
2002	\$500,000	\$250,000
2003-2004	\$1,000,000	\$250,000
2005-2008	\$1,000,000	\$200,000
2009	\$1,000,000	\$200,000/\$250,000
2010-2017	\$500,000	\$250,000

The first \$2,500 of each occurrence is treated as a deductible by the pool member who suffered the loss. MVRMA did not have an aggregate stop loss policy for periods prior to December 31, 1990; however, there is an \$850,000 aggregate "property and casualty combined" stop loss in place for the accident periods 1991 through 1993 and a \$950,000 aggregate "casualty only" stop loss for the 1994 and 1995 accident periods. There is no aggregate stop loss policy for accident periods 1996 and subsequent; rather MVRMA is aggregating premiums previously paid for such coverage into an accumulating "shock loss" fund to be used at the discretion of the MVRMA Board.

**Excess Insurance**

The following table is a synopsis of the historical excess liability coverage carried by MVRMA:

Accident Year	Liability Excess Coverage	Provider
1997-2002	\$10M excess of \$1M	National Public Entity Excess Program (NPX)
2003	\$11M excess of \$1M	Government Entities Mutual, Inc. (GEM)/ Endurance Specialty Insurance Limited
2004	\$1M excess of \$1M \$5M excess of \$2M	GEM Insurance Co. of the State of PA (AIG)
2005	\$1M excess of \$1M \$5M excess of \$2M	GEM Illinois Union Insurance Company (ACE)
2006-2008	\$1M excess of \$1M	GEM

**Miami Valley Risk Management Association**  
*Analysis of Unpaid Loss and LAE as of December 31, 2017*

	\$8M excess of \$2M	Munich Reinsurance America
2009	\$1M excess of \$1M \$8M excess of \$2M	GEM General Reinsurance Corporation
2010-2012	\$1.5M excess of \$500K \$8M excess of \$2M	GEM General Reinsurance Corporation
2013-2015	\$2.5M excess of \$500K \$7M excess of \$3M	GEM Genesis
2016-2017	\$4.5M excess of \$500K \$7M excess of \$5M	GEM Genesis

GEM is a protected cell reinsurance captive domiciled in the District of Columbia. GEM is sponsored by the National Association of Government Entity Programs, Inc. (NAGEP), a non-profit association incorporated in the District of Columbia.

# Miami Valley Risk Management Association

## *Analysis of Unpaid Loss and LAE as of December 31, 2017*

### **FINDINGS**

Based on our analysis of MVRMA's experience as of December 31, 2017, and subject to the considerations set forth in the *Reliances and Limitations* section, we have reached the conclusions set forth below.

#### **Unpaid Loss and LAE as of December 31, 2017**

The estimated total undiscounted unpaid loss and LAE as of December 31, 2017 is \$3,742,308. This amount is net of reinsurance and member deductibles. It compares to an estimated unpaid amount of \$3,113,308 from our analysis at December 31, 2016.

#### **Development in Net Loss Estimates from Prior Analysis**

The table below compares our net ultimate loss estimate as of December 31, 2017 to our estimate as of December 31, 2016 for accident years 2016 and prior. Our estimates have decreased by \$0.1 million.

<b>MIAMI VALLEY RISK MANAGEMENT ASSOCIATION</b>				
Comparison of Net Ultimate Loss to Prior Ultimate Loss (in \$000s)				
Prior to Consideration of Member's Deductibles				
Accident Year	Evaluation Date @12/31/2016	Evaluation Date @12/31/2017	Difference	Percent Change
1989-2006	\$15,490	\$15,490	0	0.0%
2007	994	994	0	0.0%
2008	1,648	1,648	0	0.0%
2009	1,533	1,533	0	0.0%
2010	1,524	1,524	0	0.0%
2011	1,319	1,291	(27)	-2.1%
2012	1,067	1,140	73	6.8%
2013	1,547	1,506	(41)	-2.7%
2014	2,637	2,417	(220)	-8.3%
2015	1,502	1,278	(225)	-15.0%
2016	1,413	1,769	356	25.2%
Total	\$30,675	\$30,590	(\$85)	-0.3%

# Miami Valley Risk Management Association

## *Analysis of Unpaid Loss and LAE as of December 31, 2017*

### **ANALYSIS**

Our analysis consisted of the steps outlined below.

#### **Development Patterns**

Our projection of future claim reporting and payment is based on MVRMA's historical experience. Using historical loss development experience provided by MVRMA, we select report-to-report (RTR) development factors. In cases for which MVRMA's historical data is not sufficiently credible, stable, or mature, we have supplemented MVRMA's experience with benchmark reporting and payment patterns.

Benchmark patterns are constructed internally by Pinnacle, drawing upon available relevant sources of loss development data. Benchmarks are revised periodically as new information and trends emerge. While each company's own development can be expected to vary from the benchmark based on individual circumstances, we believe the benchmark is an appropriate supplement to the analysis of MVRMA's data, as it represents our current judgment as to the typical emergence of loss that can be expected for that class of business.

The selected development patterns are used for both the development and Bornhuetter-Ferguson (B-F) projection methods.

#### **Initial Expected Loss Costs**

The selected initial expected loss costs (IELCs or loss per exposure) are based on a review of the paid and incurred loss development methods, the results of prior analyses, insurance industry indications, and observed trends. These IELCs form the basis of the B-F and expected loss projection methods.

#### **Selected Ultimate Losses**

In general, our selected ultimate losses are based on the results of various projection methods. Our selections are based on judgment reflecting the range of estimates produced by the methods, and the strengths and weaknesses of each method. These methods are described in the *Description of Projection Methods* section of this report.

#### **Unallocated Loss Expense Reserve**

We relied on only one method to develop estimates of indicated unpaid ULAE. We recognize there are other methods used by actuaries for estimating unpaid LAE that rely on projecting future claim counts and assigning a transaction cost to handle such claims. Regardless, the method we rely upon has been in common practice for many years and is widely accepted.

On Summary, Exhibit 4, the industry paid ULAE to paid loss ratio is applied to the estimated IBNR amounts and one-half of this ratio is applied to case reserves. This method is derived from the expectation that half of ULAE is incurred when a claim is opened and the other half at closure.

# Miami Valley Risk Management Association

## *Analysis of Unpaid Loss and LAE as of December 31, 2017*

### **General Overview of Exhibits**

The Summary exhibits combine all lines of business and compare the indicated reserves and carried reserves in total. Exhibit 1.4 shows our calculation of the indicated ULAE reserve. Exhibit 1.3 summarizes member deductible losses by AY, while Exhibit 1.2 summarizes ultimate losses by AY prior to the application of any member deductibles. Note that the aggregate retention is applied to the appropriate AY's and affects AY 1993. Exhibit 1.1 summarizes the indicated reserves from Exhibit 1.2 before and after application of the member deductibles.

### **Automobile Liability**

Exhibits 1 through 23 contain our loss analysis for AL. The claim summary and ultimate claim projection can be found in Exhibits 19 through 22. Exhibit 21 shows AL's historical reported claim experience and our selected development factors. For the majority of the AYs all claims are reported by 36 months. Exhibit 19 summarizes the claim indications including indicated IBNR claims.

Exhibits 15 and 16 show the incurred and paid loss triangles limited to \$500,000 and our initial selected development factors, respectively. Exhibits 17 and 18 show the average incurred and average paid loss triangles limited to \$500,000 and our initial selected development factors, respectively. On Exhibits 13 and 14, we estimate \$1,000,000 limits development patterns based on the \$500,000 limits development patterns and an assumed 6 month lag.

Exhibits 7 through 12 contain the development method indications using the selected development factors from Exhibits 13 and 14.

Exhibits 6.1 through 6.3 calculate the expected loss cost used in the B-F methods found in Exhibits 4 and 5. First, a limit factor is selected to adjust all AY's to a \$500,000 limit (Exhibit 6.3). Second, an initial ultimate loss is selected based on the development methods (Exhibit 6.2). Next, AY loss costs based on the initial selected ultimate losses are trended to AY 2017 with an initial loss cost selected for AY 2017. Finally, the expected loss cost for all AY's are calculated by detrending the selected AY 2017 loss cost (Exhibit 6.1).

We select ultimate losses at retained limits on Exhibit 3. Exhibit 2 provides a comparison of selected ultimate losses to those selected in our prior analysis. Exhibit 1 summarizes the loss indications including indicated IBNR losses.

The exhibits for GL and Property follow a similar layout as the AL exhibits.

# Miami Valley Risk Management Association

## *Analysis of Unpaid Loss and LAE as of December 31, 2017*

### **RELIANCES AND LIMITATIONS**

#### **Inherent Uncertainty**

Projections of loss and LAE liabilities are subject to potentially large errors of estimation, since the ultimate disposition of claims incurred prior to the financial statement date, whether reported or not, is subject to the outcome of events that have not yet occurred. Examples of these events include jury decisions, court interpretations, legislative changes, changes in the medical condition of claimants, public attitudes, and social/economic conditions such as inflation. Any estimate of future costs is subject to the inherent limitation on one's ability to predict the aggregate course of future events. It should therefore be expected that the actual emergence of losses and LAE will vary, perhaps materially, from any estimate. Thus, no assurance can be given that MVRMA's actual loss and LAE liabilities will not ultimately exceed the estimates contained herein. In our judgment, we have employed techniques and assumptions that are appropriate, and the estimates presented herein are reasonable, given the information currently available.

Note that a quantification of this uncertainty would likely reflect a range of reasonable, favorable and adverse scenarios, but not necessarily a range of all possible outcomes. Further, the proper application of any range is dependent on the context. MVRMA's financial reports are governed by accounting standards, and such standards vary among jurisdictions. Under current accounting standards, the ends of a range that is illustrative of uncertainty would likely not be suitable for financial reporting purposes.

#### **Sensitivity Analysis**

In performing this analysis, the sensitivity of key variables was considered. A number of assumptions about model variables are made in our analysis. We consider the key variables to include the selection of RTR factors, initial expected loss costs and loss cost trend factors. The overall results are potentially sensitive to any of these, and reasonable alternative selections could change the results significantly (favorably or adversely).

#### **Data Reliance**

Throughout this analysis, we have relied on historical data and other quantitative and qualitative information supplied by MVRMA. We have not independently audited or verified this information; however, we have reviewed it for reasonableness and internal consistency. We have assumed that the information is complete and accurate, and that we have been provided with all information relevant to the analysis of MVRMA's ultimate losses and LAE. The accuracy of our results is dependent upon the accuracy and completeness of the underlying data; therefore, any material discrepancies discovered in this data should be reported to us and this report amended accordingly, if warranted.

MVRMA has indicated that it will require that their independent certified public accountant subject the data significant to our loss and LAE projections to testing procedures.

#### **Extraordinary Future Emergence**

We have not anticipated any extraordinary changes to the legal, social, or economic environment that might affect the cost, frequency, or future reporting of claims. In addition, our estimates make no provision for potential future claims arising from loss causes not represented in the historical data (e.g.,

# Miami Valley Risk Management Association

## *Analysis of Unpaid Loss and LAE as of December 31, 2017*

new types of mass torts or latent injuries, terrorist acts, etc.), except where claims of these types are included but not identified in the reported claims and are implicitly analyzed.

### **Projections by Accident Year**

Consistent with the purpose of our engagement, the focus of our analysis was on MVRMA's overall reserves for unpaid claims. As such, projections shown in this report for each accident year should be viewed in the context of the entire portfolio of liabilities, not necessarily as best estimates for individual accident years.

### **Excess Insurance Collectability**

Our estimates are presented net of excess insurance. Based solely on inquiries made of MVRMA management, we understand that none of MVRMA's excess insurance is considered uncollectible. An independent evaluation of the quality of security provided by MVRMA's excess insurers is outside the scope of our engagement. We have assumed that all of MVRMA's excess insurance protection will be valid and collectible. Contingent liability may exist for any excess insurance recoveries that may prove to be uncollectible. Should such liabilities materialize, they would be in addition to the net liability estimates contained herein.

### **Underlying Assets**

We have not examined the assets underlying MVRMA's loss and LAE reserves, and we have formed no opinion as to the validity or value of these assets. We have assumed throughout the analysis that MVRMA's loss and LAE reserves are backed by valid assets with suitably scheduled maturities and/or adequate liquidity to meet cash flow requirements.

*Analysis of Unpaid Loss and LAE as of December 31, 2017*

## **DESCRIPTION OF PROJECTION METHODS**

The choice of method to estimate ultimate losses should consider, among other things, the line of business, the number of years of experience, and the age of the experience year being developed. In general, these methods can be applied to losses, ALAE, and various measures of claim counts.

### **Incurred Development Method**

The incurred development method is based upon the assumption that the relative change in a given year's incurred loss estimates from one evaluation point to the next is similar to the relative change in prior years' incurred loss estimates at similar evaluation points. In utilizing this method, actual annual historical incurred loss data is evaluated. Successive years can be arranged to form a triangle of data.

RTR development factors are calculated to measure the change in cumulative incurred costs from one evaluation point to the next. These historical RTR factors and comparable benchmark factors form the basis for selecting the RTR factors used in projecting the current valuation of losses to an ultimate basis.

This method's implicit assumption is that the relative adequacy of case reserves has been consistent over time, and that there have been no material changes in the rate at which claims have been reported.

### **Paid Development Method**

The paid development method is similar to the incurred development method; however, case reserves are excluded from the analysis. While this method has the disadvantage of not recognizing the information provided by current case reserves, it has the advantage of avoiding potential distortions in the data due to changes in case reserving methodology.

This method's implicit assumption is that the rate of payment of claims has been relatively consistent over time.

### **Case Reserve Development Method**

The case reserve development technique derives case reserve development factors through an analysis of the historical development of case reserves by period. The changes measured by the case reserve development technique include payments associated with the historical case reserves and subsequent reserve amounts for those claims remaining open.

The case reserve development factors are applied to the current case reserves by period to estimate their ultimate settlement value. Payments to date are then added to determine the ultimate losses for each period.

### **Expected Loss Method**

In the expected loss method, ultimate loss projections are based upon a prior measure of the anticipated losses, such as number of cars, expenditures, etc. An expected loss cost is applied to the measure of exposure to determine estimated ultimate losses for each year.

# Miami Valley Risk Management Association

## *Analysis of Unpaid Loss and LAE as of December 31, 2017*

Actual losses are not considered in this calculation. This method has the advantage of stability over time because the ultimate loss estimates do not change unless the expected loss costs change. However, this advantage of stability is offset by a lack of responsiveness since this method does not consider actual loss experience as it emerges.

This method is entirely dependent on the assumption that the loss cost per unit of exposure is a good indication of ultimate losses.

### **Inurred Bornhuetter-Ferguson Method**

The incurred B-F method is essentially a blend of two other methods. The first method is the loss development method whereby actual incurred losses are multiplied by an expected loss development factor. For slow reporting coverages, the loss development method can lead to erratic and unreliable projections because a relatively small swing in early reportings can result in a large swing in ultimate projections. The second method is the expected loss method whereby the IBNR estimate equals the difference between a predetermined estimate of expected losses and actual incurred losses. This has the advantage of stability, but it does not respond to actual results as they emerge.

The incurred B-F method combines these two methods by setting ultimate losses equal to actual incurred losses plus expected unreported losses. As an experience year matures and expected unreported losses become smaller, the initial expected loss assumption becomes gradually less important.

Two parameters are needed to apply the B-F method: the initial expected loss cost (IELC) and the expected reporting pattern. The IELC is selected as described in the *Analysis* section, while the expected reporting pattern is based on the incurred loss development method described above.

This method is often used for long-tail lines and in situations where the incurred loss experience is relatively immature or lacks sufficient credibility for the application of other methods.

### **Paid Bornhuetter-Ferguson Method**

The paid B-F method is analogous to the incurred B-F method using paid losses and development patterns in place of incurred losses and patterns.

### **Counts and Averages Method**

The counts and averages method calculates ultimate losses by separately projecting ultimate claim counts and ultimate claim severity (cost per claim) for each experience period. Typically, loss development methods are used to project ultimate claims and severity based on historical data. Ultimate losses are calculated as the product of the two items. This method is intended to avoid distortions that may exist with the other methods for the most recent years as the result of changes in case reserve levels, settlement rates, etc. In addition, it may provide insight into the drivers of the loss experience.

## **Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Required by *Government Auditing Standards***

Miami Valley Risk Management Association  
Montgomery County  
4625 Presidential Way  
Kettering, Ohio 45429

To the Board of Trustees:

We have audited, in accordance with auditing standards generally accepted in the United States and the Comptroller General of the United States' *Government Auditing Standards*, the financial statements of the Miami Valley Risk Management Association, Montgomery County, Ohio, as of and for the year ended December 31, 2017, and the related notes to the financial statements, which collectively comprise the Miami Valley Risk Management Association's basic financial statements and have issued our report thereon dated June 18, 2018.

### ***Internal Control Over Financial Reporting***

As part of our financial statement audit, we considered the Miami Valley Risk Management Association's internal control over financial reporting (internal control) to determine the audit procedures appropriate in the circumstances to the extent necessary to support our opinion on the financial statements, but not to the extent necessary to opine on the effectiveness of the Miami Valley Risk Management Association's internal control. Accordingly, we have not opined on it.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, when performing their assigned functions, to prevent, or detect and timely correct misstatements. A *material weakness* is a deficiency, or combination of internal control deficiencies resulting in a reasonable possibility that internal control will not prevent or detect and timely correct a material misstatement of the Miami Valley Risk Management Association's financial statements. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all internal control deficiencies that might be material weaknesses or significant deficiencies. Given these limitations, we did not identify any deficiencies in internal control that we consider material weaknesses. However, unidentified material weaknesses may exist.

Miami Valley Risk Management Association

***Compliance and Other Matters***

As part of reasonably assuring whether the Miami Valley Risk Management Association's financial statements are free of material misstatement, we tested its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could directly and materially affect the determination of financial statement amounts. However, opining on compliance with those provisions was not an objective of our audit and accordingly, we do not express an opinion. The results of our tests disclosed no instances of noncompliance or other matters we must report under *Government Auditing Standards*.

***Purpose of this Report***

This report only describes the scope of our internal control and compliance testing and our testing results and does not opine on the effectiveness of the Miami Valley Risk Management Association's internal control or on compliance. This report is an integral part of an audit performed under *Government Auditing Standards* in considering the Miami Valley Risk Management Association's internal control and compliance. Accordingly, this report is not suitable for any other purpose.
