Independent Accountants' Report on Applying Agreed-Up Procedures

Ohio Department of Medicaid
50 West Town Street, Suite 400
Columbus, Ohio 43215

RE: Katherine K. Myerholtz, C.N.P. NPI: 1578901062
Program Year 2017: Meaningful Use Stage 2 Year 1

We have performed the procedures enumerated below, which were agreed to by the Ohio Department of Medicaid (ODM), on Katherine K. Myerholtz' (hereafter referred to as the Provider) compliance with the requirements of the Medicaid Promoting Interoperability Program (MPIP) for the year ended December 31, 2017. The Provider is responsible for compliance with the MPIP requirements. The sufficiency of these procedures is solely the responsibility of ODM. Consequently, we make no representation regarding the sufficiency of the procedures enumerated below either for the purpose for which this report has been requested or for any other purpose.

1. We compared encounters from the Quality Decision Support System to the Medicaid encounters reported on the Provider's Enrollment Summary for the 2017 patient volume period. The variance was less than 20 percent.
2. We compared total encounters reported in the Provider's Enrollment Summary for the 2017 patient volume period to the enrollment data submitted for 2016 and 2018. The variance for each year was less than 20 percent.
3. We compared the system generated dashboards for an alternate period (September 23, 2017 to December 21, 2017) to the applicable criteria and to the Meaningful Use Objectives 3 through 9 and Clinical Quality Measure Summaries. We found Objective 5: Health Information Exchange did not meet the applicable criteria. We found all other reported objectives met the applicable criteria. We noted variances in the percentage reported greater than 10 for Objective 8, Measure 1: Timely Electronic Access and Objective 8, Measure 2: View, Download and Transmit Health Information. As a result, we performed additional procedures.
4. We scanned the Provider's encounters during the patient volume attestation period and verified that there were no duplicates and that the encounters included multiple payer sources. We calculated the Medicaid patient volume from the encounters and confirmed the Provider met the 30 percent requirement.
5. The Provider's location was now using a newer version of the electronic health record (EHR) software reported in the MPIP system. We verified that the newer version of the EHR software was approved by the Office of the National Coordinator of Health IT.
6. We compared the Provider's equipped practice location during the meaningful use period to the location included in the meaningful use report. We found no exception.

7. We compared supporting documentation for the 10 objectives for an alternate Meaningful Use period (September 23, 2017 to December 21, 2017) to the applicable criteria. We verified that all reported objectives met the applicable criteria. For those objectives that require only unique patients be counted, we scanned the detailed data for each query and found no duplicates.
8. We compared the system generated dashboard for the alternate Clinical Quality Measures period (September 23, 2017 to December 21, 2017) to the applicable criteria and verified that the minimum requirements were met.

This agreed-upon procedures engagement was conducted in accordance with the American Institute of Certified Public Accountants' attestation standards. We were not engaged to and did not conduct an examination or review, the objective of which would be the expression of an opinion or conclusion, respectively, on the Provider's compliance with the requirements of the Medicaid Promoting Interoperability Program. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported.

This report is intended solely for the information and use of the ODM, and is not intended to be, and should not be used by anyone other than the specified party.
