CITY OF OAKWOOD MONTGOMERY COUNTY

REGULAR AUDIT FOR THE YEAR ENDED DECEMBER 31, 2021

88 East Broad Street Columbus, Ohio 43215 IPAReport@ohioauditor.gov (800) 282-0370

Members of Council City of Oakwood 30 Park Avenue Oakwood, Ohio 45419

We have reviewed the *Independent Auditor's Report* of the City of Oakwood, Montgomery County, prepared by Plattenburg & Associates, Inc., for the audit period January 1, 2021 through December 31, 2021. Based upon this review, we have accepted these reports in lieu of the audit required by Section 117.11, Revised Code. The Auditor of State did not audit the accompanying financial statements and, accordingly, we are unable to express, and do not express an opinion on them.

Our review was made in reference to the applicable sections of legislative criteria, as reflected by the Ohio Constitution, and the Revised Code, policies, procedures and guidelines of the Auditor of State, regulations and grant requirements. The City of Oakwood is responsible for compliance with these laws and regulations.

INDEPENDENT AUDITOR'S REPORT

Honorable Mayor and the City Council City of Oakwood, Ohio

Report on the Audit of the Financial Statements

Opinions

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Oakwood, Ohio (the City) as of and for the year ended December 31, 2021, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City, as of December 31, 2021, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the City and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the City's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the City's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, budgetary comparison information and schedules of pension information and other postemployment information to be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated May 3, 2022, on our consideration of the City's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the City's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control over financial reporting and compliance.

Management's Discussion and Analysis (Unaudited) For the Year Ended December 31, 2021

Our discussion and analysis of the City of Oakwood, Ohio's financial performance provides an overview of the City's financial activities for the fiscal year ended December 31, 2021.

Financial Highlights

- Net position increased by \$5,551,204 or 13.86% and unrestricted net position increased to \$5,960,335 from (185,314).
- Total revenues decreased \$7,700 or 0.04% and total expenses decreased \$4,032,693 or 22.02%.
- Income taxes increased \$946,618 or 10.88%.
- Total fund balances of governmental activities increased by \$1,903,030 or 11.83%.
- Governmental fund revenues increased \$29,563 or 0.18% and governmental fund expenditures increased \$692,557 or 5.07%.
- The net position of the City's business-type activities increased by \$1,206,792 or 22.70%.
- Total revenue of business-type activities decreased \$221,151 or 5.97% and total expenses decreased \$995,033 or 30.41%.
- The General Fund balance increased \$1,811,272 or 16.29%.
- The General Fund revenues increased \$523,400 or 3.61% and expenditures increased \$1,074,542 or 10.52%.

Using this Annual Financial Report

This annual report consists of a series of financial statements. The Statement of Net Position and Statement of Activities provide information about the activities of the City as a whole and present a longer-term view of the City's finances. Fund financial statements provide the next level of detail. For governmental activities, these financial statements tell how services were financed in the short-term as well as the amount of funds available for future spending. The remaining statements provide financial information about activities for which the City acts solely as a trustee or agent for the benefit of those outside government.

Reporting the City as a Whole

Statement of Net Position and the Statement of Activities

While this document contains a large number of funds used by the City to provide programs and activities, the view of the City as a whole looks at all financial transactions and asks the question, "How did we do financially during 2021?" The Statement of Net Position and the Statement of Activities help to answer this question. These statements include all assets and deferred outflows of resources, liabilities and deferred inflows of resources using the accrual basis of accounting, which is similar to the accounting used by most private-sector companies. All current year's revenues and expenses are taken into account regardless of when cash is received or paid. These two statements report the City's position and changes in that net position. This change informs the reader whether the

Management's Discussion and Analysis (Unaudited) For the Year Ended December 31, 2021

City's financial position, as a whole, has improved or diminished. In evaluating the overall financial health, the reader of these financial statements should take into account non-financial factors that also impact the City. Some of these factors include the City's tax base, the condition of its capital assets, and the reputation of the public schools to assess the overall health of the City.

In the Statement of Net Position and the Statement of Activities, the financial information of the City is divided into two kinds of activities:

- Governmental Activities Most of the City's services are reported here including police and fire
 protection, recreation and parks, community environment, street repair and maintenance, and general
 government.
- Business-Type Activities These services include the water, sanitary sewer and stormwater departments
 where the fees charged for these services are based upon the amount of usage and the intent is to recoup
 operational costs through the user fees.

Reporting the City's Most Significant Funds

Fund Financial Statements

Fund financial reports provide detailed information about each major fund. The major funds of the City include the General, Health District, Water, Sanitary Sewer and Stormwater funds. The City uses many funds to account for a multitude of financial transactions. However, the focus of the fund financial statements is on the City's most significant funds, and therefore only the major funds are presented in separate columns. All other funds are combined into one column for reporting purposes.

Governmental Funds

Most of the City's activities are reported in the governmental funds, which focus on how money flows into and out of the funds, and the balances left at year-end which would be available for spending in future periods. These funds are reported using an accounting method called modified accrual, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the City's general government operations and the basic services it provides. Governmental fund information helps you determine whether there are more or fewer financial resources that can be spent in the near future on services provided to our residents. The relationship (or differences) between governmental activities (reported in the Statement of Net Position and the Statement of Activities) and governmental funds is reconciled in the financial statements.

Management's Discussion and Analysis (Unaudited) For the Year Ended December 31, 2021

Proprietary Funds

When the City charges citizens for the services it provides, with the intent of recouping operating costs, these services are generally reported in proprietary funds. Proprietary funds use the same basis of accounting as business-type activities; therefore, these statements will essentially match. Internal service funds are used to report activities that provide services to the City's other funds and departments.

Custodial Fiduciary Funds

The financial activity of custodial funds, for which the City acts as the fiscal agent, is reported separately in the Statement of Assets and Liabilities. This financial activity is excluded from the City's other financial statements because the City cannot use these assets to finance its operations. The City is responsible for ensuring the assets reported in these funds are used for their intended purposes.

The City as a Whole

The following table presents condensed information on Net Position for the year:

	Governmen	tal Activities	rivities Business-Type		To	tal

Unrestricted	2,013,896	(2,605,595)	3,761,125	2,420,281	5,775,021	(185,314)
Total net position	\$39,073,075	\$34,728,663	\$ 6,523,553	\$ 5,316,761	\$45,596,628	\$40,045,424

The largest impacts on the City's financial statements in 2021 and 2020 had absolutely no impact on the City's financial condition; GASB Statement 68, "Accounting and Financial Reporting for Pensions—an Amendment of GASB Statement 27" and GASB Statement No. 75, "Accounting and Financial Reporting for Postemployment Benefits Other Than Pension" (OPEB). GASB Statement No. 75 and GASB Statement No. 68 required the City to recognize a liability of \$1.3 million for OPEB and \$12.8 million for pension. For reasons discussed below, these liabilities serve only to distort the true financial position of the City. Users of this financial statement will gain

Management's Discussion and Analysis (Unaudited) For the Year Ended December 31, 2021

a clearer understanding of the City's actual financial condition by adding deferred inflows related to pension and OPEB and the net pension and OPEB liabilities to the reported net position and subtracting the net pension asset and deferred outflows related to pension and OPEB. The resulting net position would be \$61,295,156, which is \$15.7 million more than the net position presented.

Governmental Accounting Standards Board standards are national and apply to all government financial reports prepared in accordance with generally accepted accounting principles. Prior accounting for pensions (GASB Statement No. 27) and postemployment benefits (GASB Statement No. 45) focused on a funding approach. This approach limited pension and OPEB costs to contributions annually required by law or actuarially determined, which may or may not be sufficient to fully fund each plan's *net pension liability or net OPEB liability*. GASB Statements No. 68 and No. 75 take an earnings approach to pension and OPEB accounting; however, the nature of Ohio's statewide pension / OPEB plans and state law governing those systems require additional explanation to properly understand the information presented in these statements. GASB Statements No. 68 and 75 require the net pension liability and the net OPEB liability (asset) to equal the City's share of each plan's:

- 1. Present value of estimated future pension/OPEB benefits attributable to active and inactive employees' past service; and
- 2. Minus plan assets available to pay these benefits.

GASB notes that pension and OPEB obligations and assets, whether funded or unfunded, are part of the "employment exchange"—that is, the employee is trading his or her labor in exchange for wages, benefits, and the promise of a future pension and other postemployment benefits. GASB noted that the unfunded portion of this promise is a present obligation of the government, part of a bargained-for benefit to the employee, and should accordingly be reported by the government as a liability since they received the benefit of the exchange. However, the City is not responsible for certain key factors affecting the balance of these liabilities. In Ohio, the employee shares the obligation of funding pension and OPEB benefits with the employer. Both employer and employee contribution rates are capped by State statute. A change in these caps requires action of both Houses of the General Assembly and approval of the Governor. Benefit provisions are also determined by State statute. The Ohio revised code permits, but does not require the retirement systems to provide healthcare to eligible benefit recipients. The retirement systems may allocate a portion of the employer contributions to provide for these OPEB benefits.

The employee enters the employment exchange with the knowledge that the employer's promise is limited not by contract but by law. The employer enters the exchange also knowing that there is a specific, legal limit to its contribution to the plans. In Ohio, there is no legal means to enforce the unfunded liabilities of the pension and OPEB system as against the public employer. State law operates to mitigate/lessen the moral obligation of the public employer

Management's Discussion and Analysis (Unaudited) For the Year Ended December 31, 2021

to the employee, because all parties enter the employment exchange with notice as to the law. The retirement system is responsible for the administration of the pension and OPEB plans.

Most long-term liabilities have set repayment schedules or, in the case of compensated absences (i.e. sick and vacation leave), are satisfied through paid time-off or termination payments. There is no repayment schedule for the net pension liability and net OPEB liability. As explained above, changes in benefits, contribution rates, and return on investments affect the balance of these liabilities, but are outside the control of the local government. In the event that contributions, investment returns, and other changes are insufficient to keep up with required payments, State statute does not assign/identify the responsible party for the unfunded portion. Due to the unique nature of how the net pension liability and net OPEB liability are satisfied, these liabilities are separately identified within the long-term liability section of the statement of net position.

In accordance with GASB Statement No. 68 and GASB Statement No. 75, the City's statements prepared on an accrual basis of accounting include an annual pension expense and an annual OPEB expense for their proportionate share of each plan's *change* in net pension liability and net OPEB liability, respectively, not accounted for as deferred inflows/outflows.

For 2021, the City's assets and deferred outflows of resources exceeded liabilities and deferred inflows of resources by a total of \$45.6 million. This represents an increase of 13.86% from the prior year.

Explanations for larger fluctuations between years are as follows:

- The increase in income tax revenues is due in part to individual income taxes associated with the impact of the advent of work from home caused by COVID-19 as well as the over 4.0% rise in US salaries during 2021.
- Property taxes increased due to the revaluation completed in 2020 by Montgomery County and reflected in property taxes collected in 2021.
- Operating grants and contributions and capital grants and contributions decreased from 2020 due to CARES Act funding received as a result of the COVID-19 public health emergency in 2020.
- Charges for services in leisure time activities increased in 2021 compared to 2020 as a result of the return to normal operations in 2021.
- Expenses decreased in 2021 because of the impact of GASB Statements No. 68 and 75. The annual pension expense and an annual OPEB expense for the proportionate share of each plan's *change* in net pension liability and net OPEB liability resulted in a decrease of expense of \$3.4 million.

Management's Discussion and Analysis (Unaudited) For the Year Ended December 31, 2021

Management's Discussion and Analysis (Unaudited) For the Year Ended December 31, 2021

As indicated by the table above, the City is spending more than half of its resources (51.27%) on the security of person and property (public safety) and community environment activities. The operation of the public safety department is 35.90% of total program expenses, revenues generated by the public safety department cover only 5.47% of functional expenses. This means that general revenues collected by the City, principally income and property taxes, must cover the remaining 94.53% of expenses reported by the public safety department. Refuse collection fees are the most significant program revenue source that helps offset the expenses reported for the community environment functions.

General government functions, principally legislative, administration and judicial activities, comprise 18.89% of the total governmental expenses. Most of the program revenue generated by this function is associated with court fees and fines, as well as other charges for services and operating grants. Charges for services and fees associated with the leisure department accounted for 48.51% of the leisure time activities functional expenses. Normally charges for services and fees for the leisure department cover slightly more than 50.0% of expenditures. The impact of COVID-19 still impacted the recreation activities during 2021 resulting in reduced leisure department revenues. Expenses associated with street resurfacing, street maintenance, snow removal and operation of the public works department are all included within the transportation function. General revenues comprise 80.58% of the total governmental revenues collected by the City during 2021. Principal components of general revenues; including income taxes (74.13%) and property taxes (21.05%), are used to furnish the quality of life and services to citizens and businesses to which they have become accustomed.

Business-Type Activities

The City's business-type activities include the Water, Sanitary Sewer and Stormwater operations.

<u>Water</u> – The water department at the City of Oakwood is responsible for the production, treatment and delivery of quality water to businesses and citizens within the boundaries of the City. Various functions within the water department include administration, water production, water distribution and maintaining and upgrading the infrastructure used to produce, treat and distribute the water. The water department in 2021 experienced operating income of \$395,928, compared to a loss of \$1,227 in 2020. Operating results for the water fund can vary greatly depending in large part on the amount of irrigation water used throughout the city during the summer months, which is a function of the amount of rainfall during any given year. At December 31, 2021 the unrestricted net position represented 128.26% of the operating expenses reported for 2021.

<u>Sanitary Sewer</u> – The City's sanitary sewer department is responsible for the collection and disposal of sanitary wastewater generated throughout the City. The City does not treat sanitary wastewater within our City and must rely on the City of Dayton and Montgomery County for this service. The cost for this sanitary wastewater treatment

Management's Discussion and Analysis (Unaudited) For the Year Ended December 31, 2021

service represents about 68% of our sanitary sewer costs. Various functions within the sanitary sewer department include administration, disposal, and maintaining and upgrading infrastructure used in the collection and disposal of sanitary wastewater. The sanitary sewer department recognized operating income of \$406,332 during 2021 as compared to operating income of \$316,533 reported for 2020.

<u>Stormwater</u> – The City's stormwater department is responsible for managing stormwater runoff in a manner consistent with the EPA's National Pollutant Discharge System standards. Citizens are charged a stormwater fee based on their impervious area of developed property. The fund experienced operating income in 2021 of \$317,876 as compared to operating income of \$141,520 reported in 2020.

Overall, the City's business-type activities generated \$3.47 million in program revenue during 2021, while program expenses were \$2.28 million. The business-type activities incurred an overall increase in net position of \$1,206,792. It should be noted that the unrestricted net position of the business-type activities totaled \$3.76 million at the end of 2021. The amount of unrestricted net position for business-type activities reported at December 31, 2021 equaled 165.19% of the total expenses reported for business-type activities for 2021. Management will continue to monitor utility rate charges and necessary adjustments will be made to provide any additional financial resources needed.

The City's Funds

The governmental funds of the City are reported using the modified accrual basis of accounting. These funds had total revenues of \$16.24 million and expenditures of \$14.34 million for 2021. In total, the governmental funds reported a \$1,903,030 increase in total fund balance for the year. In 2020, the fund balance of the City's governmental funds increased by \$2,566,024. The increase in 2020 is primarily the result of the CARE Act grant monies and Bureau of Workers' Compensation dividends received as a result of the COVID-19 public health emergency. The restricted, committed, assigned, and unassigned fund balances may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year; these fund balances at December 31, 2021 were \$17.68 million, or 123.31% of the total expenditures reported for the governmental funds for 2021.

The City's General Fund realized a \$1,811,272 increase in fund balance during 2021 as compared to the \$1,875,065 increase in 2020. Annually, the General Fund transfers amounts to other funds to cover recreation, street maintenance, state highway and other programs. These transfers also pay for capital improvement projects and construction of capital assets. The General Fund transferred \$1,923,491 to other funds in 2021 as compared to \$2,410,840 to other funds in 2020.

Explanation of the changes in the three enterprise funds of the City, the water, sanitary sewer and stormwater funds, follow the same explanations as those provided in the assessment of the business-type activities noted above since

Management's Discussion and Analysis (Unaudited) For the Year Ended December 31, 2021

enterprise funds are accounted for using full accrual accounting, the same accounting basis used in the city-wide statements.

General Fund Budgeting Highlights

The City's budget is adopted on a fund basis. Before the budget is adopted, council reviews the detailed budgets of each department within the General Fund and other funds, and then adopts the budget on a fund basis. Within each departmental budget, a department head, with the City Manager's approval, may make small line adjustments within their budget, as long as the total operational and maintenance amount does not exceed their budgetary allotment.

For the General Fund, budget basis revenue was \$11.55 million as compared to the actual revenues received of \$13.27 million. The City's variances in revenues received were from the following:

- Income tax revenue was \$1,485,614 more than budget because
- Property tax revenue was \$320,373 more than budget as a result of City property tax collections were better than the county anticipated rate of 95% which was used for budgeting purposes.

The budgeted expenditures of the City changed by a total of \$797,730 from the original budget to the final budget in transfers. Additional amounts of \$280,000 and \$517,730 were transferred from the general fund to the Equipment Replacement Fund and the Capital Improvement Fund, respectively. Actual expenditures were \$151,909 less than budgeted. For the year ended December 31, 2021 the total actual budgetary change in fund balance for the General Fund was an increase of \$1,669,034 resulting in a reported \$9,094,949 ending budgetary fund balance. The ending budgetary fund balance or unencumbered fund balance reported at the end of the year was 105.44% of the total budgetary expenditures of the General Fund for 2021.

Capital Assets

At the end of 2021, the City had a total of \$79.36 million invested in capital assets less accumulated depreciation of \$41.67 million resulting in total capital assets, net of accumulated depreciation of \$37.69 million.

During 2021, significant asset additions were as follows:

- Asphalt and concrete street, sidewalk, curb and apron replacement totaling \$406,324;
- In car and body worn cameras for the safety department totaling \$114,625;
- Refuse and Street Vehicles totaling \$418,788; and
- Council Chambers and OCC Great Room electronic meeting room upgrades \$84,493.

Management's Discussion and Analysis (Unaudited) For the Year Ended December 31, 2021

Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances of Governmental Funds to the Statement of Activities For the Year Ended December 31, 2021

Net change in fund balances - total governmental funds	\$	1,903,030
Amounts reported for governmental activities in the Statement of Activities are different because:		
Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets are allocated over their useful lives as depreciation expense:		
Capital asset additions	1,164,060	
Current year depreciation	(1,635,327)	
		(471,267)
Revenues in the Statement of Activities that do not provide current		
financial resources are not reported as revenues in the funds.		108,456
Contractually required pension contributions are reported as expenditures in		
governmental funds; however, the statement of net position reports		
these amounts as deferred outflows.		1,109,138
Contractually required OPEB contributions are reported as expenditures in		
governmental funds; however, the statement of net position reports		
these amounts as deferred outflows.		17,168
Except for amounts reported as deferred inflows/outflows, changes		
in the net pension liability are reported as pension expense in the		
statement of activities.		(757,789)
Except for amounts reported as deferred inflows/outflows, changes in the		
net OPEB asset and the net OPEB liability are reported as OPEB expense		
in the statement of activities.		2,245,645
Internal service funds are used to charge the costs of certain activities, such		
as insurance and vehicle maintenance to the individual funds as reported		
in the Statement of Activities.		303,961
Some expenses reported in the Statement of Activities do not require		
the use of current financial resources and, therefore, are not reported		
as expenditures in governmental funds:		(112.020)
Compensated absences		(113,930)
Change in net position of governmental activities	\$	4,344,412

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Reporting Entity

The City of Oakwood, Ohio, (the "City") is a home rule municipal corporation operating under the laws of the State

of Ohio and under its own charter. The City was incorporated on July 29, 1907. A charter was first adopted on July

1, 1960.

The municipal government provided by the charter is known as a Council-Manager form of government.

Legislative power is vested in a five-member council, each elected to four-year terms. The council appoints the

Mayor and City Manager. The City Manager is the chief executive officer and the head of the administrative

agencies of the City. The City Manager appoints all department heads and employees, except as otherwise provided

in the charter.

The reporting entity consists of (a) the primary government, i.e. the City; (b) organizations for which the City is

financially accountable, and (c) governmental organizations for which the City is not financially accountable, but for

which the nature and significance of their financial relationship with the City are such that exclusion would cause

the reporting entity's statements to be misleading or incomplete.

The accompanying financial statements present the primary government and its component units, entities that are

legally separate organizations for which the primary government is financially accountable. A blended component

unit, although a legally separate entity, is, in substance, part of the City's operations. A discretely presented

component unit is reported in a separate column in the government-wide financial statements to emphasize that it is

legally separate from the City. The component unit has a fiscal year end of December 31.

Blended Component Unit: City of Oakwood Health District

The City of Oakwood Health District was created in 1931 by Oakwood City Council and its governing body, the

Oakwood Board of Health, was established on July 1, 1960, when the City adopted its first charter. The Health

District addresses all issues related to public health including overseeing the inspections of homes for sale, rental

properties, food service operations, retail food establishments, public swimming pools, schools, the municipal jail,

and response to public health complaints and nuisances. The financial data of the Health District is reported as part

of the primary government because it is fiscally dependent upon the City. The Health District is a separate legal

entity for financial reporting purposes. Fund statements are available from the city of Oakwood.

2.5

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Description of Government-wide Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the non-fiduciary activities of the primary government. All fiduciary activities are reported only in the fund financial statements. Governmental activities, which are normally supported by taxes, intergovernmental revenues, and other non-exchange transactions, are reported separately from business-type activities, which rely to a significant extent on fees and charges to external customers for support.

Basis of Presentation - Government-wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the non-fiduciary activities of the City. For the most part, the effect of interfund activity has been removed from these statements. Government-wide financial statements do not provide information by fund, but distinguish between the City's governmental activities and the business-type activities.

The statement of activities presents a comparison between direct expenses and program revenues for each function of the City's governmental activities. Direct expenses are those that are clearly identifiable with a specific function or activity. Program revenues include (a) charges to those who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or identifiable activity and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program or identifiable activity. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues. Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements. All remaining governmental and enterprise funds are aggregated and reported as non-major funds.

The City reports the following major governmental funds:

The *General Fund* is the City's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund. The general fund balance is available to the City for any purpose provided it is expended or transferred according to the general laws of Ohio and the charter of the City.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The *Health District Fund* accounts for the City's public health activities, including inspections, issuance of licenses and the operation of a public health district and bureau of vital statistics.

The City reports the following major enterprise funds:

The *Water Fund* accounts for the provisions of water treatment and distribution to the residential and commercial users located within the City.

The Sanitary Sewer Fund accounts for the provisions of sanitary sewer service to the residents and commercial users located within the city.

The *Stormwater Fund* is not a major enterprise fund; however, it is the only other enterprise fund. The fund accounts for all activities associated with managing stormwater runoff within the city.

Additionally, the City reports the following fund types:

The *Internal Service Funds* account for the financing of goods or services provided by one department to other departments in the City. These goods and services include vehicle maintenance and payment of self-insurance vision program deductibles.

The Custodial Fiduciary Funds are used to account for the collection and disbursement of monies by the City on behalf of other individuals, organizations or other governmental entities. The following are the City's custodial fiduciary funds. The Martin Luther King Jr. Community Recognition Fund accounts for funds related to Dr. Martin Luther King Jr. holiday celebration events. The Fire Insurance Trust Fund accounts for funds received from a resident's fire insurance policy to insure repairs are made to any structure damaged by fire. The funds are returned to the insured once repairs are completed. The Municipal Court Fund accounts for activity relating to the Oakwood Municipal Court. The Contractor's Permits Fund accounts for monies placed on deposit with the City during the current calendar year and subsequently applied, at the direction of the contractor, to payment of permit fee obligations during the same current calendar year. Monies remaining in the account at the end of the year are transferred to the City's General Fund.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Basis of Accounting

The accounting and financial reporting treatment is determined by the applicable measurement focus and basis of accounting. Measurement focus indicates the type of resources being measured and the basis of accounting indicates the timing of transactions or events for recognition in the financial statements.

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenues as soon as all eligibility requirements imposed by the provider have been met.

Custodial fiduciary fund statements are reported using the economic resources measurement focus and the accrual basis of accounting. A liability to the beneficiaries of a fiduciary activity is recognized in a fiduciary fund when an event has occurred that compels the government to disburse fiduciary resources. Events that compel a government to disburse fiduciary resources occur when a demand for the resources has been made or when no further action, approval, or condition is required to be taken or met by the beneficiary to release the assets.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough after to pay liabilities of the current period. For this purpose, the City considers revenues available if they are collected within 30 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences, claims and judgments, are recorded only when payment is due.

Property taxes, income taxes and investment income associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. All revenue items are considered to be measurable and available only when cash is received by the City.

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

proprietary fund's principal ongoing operations. The principal operating revenues of the enterprise funds include

the cost of these goods and services provided. Operating expenses of the enterprise funds include the cost of these

goods and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not

meeting this definition are reported as non-operating revenues and expenses.

Internal balance amounts are eliminated in the governmental and business-type activities columns of the statement

of net position, except for any net residual amounts due between governmental and business-type activities, which

are presented as "internal balances". The internal balances line item comprises the allocation of the business-type

activities interest in the internal service funds that are included within the governmental activities.

Pooled Cash and Investments

Investments are reported at fair value, which is based on quoted market prices. For investments in open-end mutual

funds, fair value is determined by the fund's share price. Investments with an original maturity of three months or

less at the time of purchase, and investments of the cash management pool are reported as cash equivalents on the

financial statements.

Receivables

All receivables are reported at their gross value and, where appropriate, are reduced by the estimated portion that is

expected to be uncollectible.

Inventory

Inventories consist of consumable supplies and are stated at cost, using the first-in/first-out (FIFO) method. The

cost of such inventories is recorded as expenses / expenditures when consumed rather than purchased.

Prepaid Items

Payments made to vendors for services that will benefit future periods are recorded as prepaid expenses in both the

government-wide and fund financial statements. The cost of prepaid items is recorded as expenses / expenditures

when consumed rather than purchased.

29

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Accrued Liabilities and Long-Term Obligations

All payables, accrued liabilities and long-term obligations are reported in the government-wide financial statements.

In general, the governmental fund payables and accrued liabilities that, once occurred, are paid in a timely manner

and in full from current financial resources are reported as obligations of the funds. However, claims and

compensated absences that will be paid from governmental funds are reported as a liability in the fund financial

statements only to the extent that they are due for payment during the current fiscal year. Net pension / OPEB

liability should be recognized in the governmental funds to the extent that benefit payments are due and payable and

the pension / OPEB plan's fiduciary net position is not sufficient for payment of those benefits.

Capital Assets

Capital assets include land, land improvements, buildings, improvements, vehicles, machinery, equipment,

infrastructure, construction in progress and all other assets used in operations and that have initial useful lives

expending beyond a single reporting period. Infrastructure is defined as long-lived capital assets that are normally

stationary in nature and can be preserved for a significantly greater number of years than most capital assets.

Capital assets are defined by the City as assets with an initial, individual cost of more than \$5,000 and an estimated

useful life in excess of one year. Such assets are recorded at historical cost, or estimated historical cost if actual

historical cost is not available. Donated capital assets are recorded at acquisition value at the date of donation.

Capital assets are recorded as expenditures of the current period in the governmental fund financial statements and

are not depreciated. The cost of normal maintenance and repairs that do not add to the value of the asset or

materially extend assets' lives is not capitalized. All capital assets are depreciated except for land and construction

in progress. Improvements are depreciated over the remaining useful lives of the related capital assets.

Depreciation is computed using the straight-line method over the estimated useful lives of the assets. Estimated

useful lives of the various classes of depreciable capital assets are as follows:

Vehicles and equipment

5-25 years

Buildings and land improvements

10-50 years

Infrastructure

15-50 years

30

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Compensated Absences

The City's policy permits employees to accumulate earned but unused vacation and sick leave benefits, which are eligible for payment upon separation from government service. All vacation and sick leave is accrued when incurred in the government-wide and proprietary fund financial statements. A liability for these amounts is reported in governmental funds only if they have matured as a result of employee resignations and retirements.

Fund Balance Classifications

The following classifications of fund balances are used by the City:

- > Nonspendable fund balance amounts that are not in a spendable form (such as inventory) or are required to be maintained intact;
- > Restricted fund balance amounts constrained to specific purposes by their providers (such as grantors, donors, and higher levels of government), through constitutional provisions, or by enabling legislation;
- > Committed fund balance amounts committed to specific purposes by a government itself, using its highest level of decision-making authority; to be reported as committed, amounts cannot be used for any other purpose unless the government takes the same highest level action to remove or change the constraint;
- Assigned fund balance amounts a government intends to use for a specific purpose; intent can be expressed by the governing body or by an official or body to which the governing body delegates the authority;
- ➤ Unassigned fund balance amounts that are available for any purpose; positive amounts are reported in the general fund only.

The City applies restricted resources when an expense is incurred for which both restricted and unrestricted (committed, assigned and unassigned) fund balances are available. The City considers committed, assigned and unassigned fund balances, respectively to be spent when expenditures are incurred for purposes for which any of the unrestricted fund balance classification could be used.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Pensions and Other Postemployment Benefits (OPEB)

For purposes of measuring the net pension and OPEB liability, net OPEB asset, deferred outflows of resources and deferred inflows of resources related to pensions and OPEB, and pension and OPEB expense, information about the fiduciary net position of the pension and OPEB plans and additions to/deductions from their fiduciary net position have been determined on the same basis as they are reported by the pension and OPEB plan. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. The pension and OPEB plans report investments at fair value.

Deferred Outflows and Inflows of Resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. Deferred outflows of resources, represents a consumption of net position that applies to a future period and will not be recognized as an outflow of resources (expense/expenditure) until then. For the City, deferred outflows of resources are reported on the government-wide statement of net position. The deferred outflows of resources related to pension and OPEB plans are explained in Notes 5 and 6.

In addition to liabilities, the statement of financial position reports a separate section for deferred inflows of resources. Deferred inflows of resources represent an acquisition of net position that applies to a future period and will not be recognized as an inflow of resources (revenue) until that time. For the City, deferred inflows of resources include property taxes, pension, OPEB and unavailable revenue. Property taxes represent amounts for which there is an enforceable legal claim as of December 31, 2021, but which were levied to finance fiscal year 2022 operations. These amounts have been recorded as a deferred inflow on both the government-wide statement of net position and the governmental fund financial statements. Unavailable revenue is reported only on the governmental funds balance sheet, and represents receivables which will not be collected within the available period. For the City, unavailable revenue includes delinquent property taxes, income taxes, special assessments and intergovernmental grants. These amounts are deferred and recognized as an inflow of resources in the period the amounts become available. The details of these unavailable revenues are identified on the reconciliation of total governmental fund balance to net position of governmental activities found on page 18. Deferred inflows of resources related to pension and OPEB plans are reported on the government-wide statement of net position. (See Notes 5 and 6).

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Net Position

Net position is reported as restricted when there are limitations imposed on their use either through enabling legislation adopted by the City or through external restrictions imposed by creditors, grantors or laws or regulations of other governments. The City applies restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net position is available. Of the City's \$2,126,879 in restricted net position, none was restricted by enabling legislation.

Estimates

The preparation of the financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Grants and Other Intergovernmental Revenues

All reimbursement-type grants are recorded as intergovernmental receivables and revenues or deferred inflows of resources when the related expenditures are incurred.

Interfund Transactions and Transfers

During the course of normal operations, the City has numerous transactions among funds, most of which are in the form of transfers used to move unrestricted revenues collected in the general fund to finance various programs accounted for in other funds in accordance with budgetary authorizations. The accompanying financial statements generally reflect such transactions as transfers, with the exception of the internal service fund which is used to account for various supplies and services which are then charged back to the appropriate fund on an "as used" basis. The internal service fund records such charges as operating revenues; all other City funds record payments to the internal service fund as operating expenditures.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 2 – POOLED CASH AND INVESTMENTS

The City maintains a cash and investments pool that is available for use by all funds. Money for all funds, including the City of Oakwood Health District, a blended component unit, and proprietary funds, is maintained in this pool. Individual fund integrity is maintained through the City's records. Each fund's interest in the pooled bank account is presented as "pooled cash and investments" on the financial statements.

Investment earnings are distributed to the funds according to charter and statutory requirements. Investment earnings reported in the statement of activities for 2021 amounted to \$5,461. This amount includes an increase of \$3,268 to reflect the market value of the City's investments at December 31, 2021.

The provisions of the Charter and Codified Ordinances of the City and the Ohio Revised Code govern the investment and deposit of City monies. In accordance with these provisions, only financial institutions located in Ohio and primary securities dealers are eligible to hold public deposits. The provisions also permit the City to invest its monies in certificates of deposit, savings accounts, money market accounts, the State Treasurer's investment pool (STAR Ohio) and obligations of the United States government or certain agencies thereof. The City may also enter into repurchase agreements with any eligible depository for a period not exceeding five years.

Deposits: At year end, the City's bank balance was \$19,132,692. Of the bank balance, \$783,447 was insured by federal deposit insurance; the remaining \$18,349,245 was collateralized through participation in the Ohio Pooled Collateral System (OPCS). Custodial credit risk is the risk that, in the event of bank failure, the City will not be able to recover deposits or collateral securities that are in the possession of an outside party. Ohio law requires that deposits either be insured or protected by (1) eligible securities pledged to the City and deposited with a qualified trustee by the financial institution as security for repayment whose market value at all times shall be at least 105 percent of the deposits being secured, or (2) participation in the Ohio Pooled Collateral System, a collateral pool of eligible securities deposited with a qualified trustee and pledged to the Treasurer of State to secure the repayment of all public monies deposited in the financial institution. OPCS requires the total market value of the securities pledged to be 102 percent of the deposits being secured. The City has no deposit policy for custodial credit risk beyond the requirements of State statute.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 2 – DEPOSITS AND INVESTMENTS (Continued)

Investments: At year-end, the City had the following investments:

	Investment Maturities (in Years)							
	Fair	I	ess than	Oı	ne to Five	Fiv	e to Seven	
	 Value		One Year		Years		Years	
Negotiable Certificates of Deposits	\$ 953,069	\$	248,038	\$	705,031		-	
Federal Home Loan Bank Bonds	1,497,532		-		1,497,532		-	
Federal Home Loan Structured Notes	 998,495		-		248,675		749,820	
Total	\$ 3,449,096	\$	248,038	\$	2,451,238	\$	749,820	

The City categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. All of the City's investments are Level 2 inputs.

<u>Interest Rate Risk</u> – The City's investment policy states that the maximum maturity for any investment is limited to a final stated maturity of seven years, an expected call of seven years, or an expected average life of seven years, where the average life is estimated by nationally recognized firms independent of the dealer selling the security to the City.

<u>Credit Risk</u> – The City's investment policy states that investment in corporate entities must have a debt rating of AA or better by Standard & Poors' or Moody's rating service.

<u>Concentration of Credit Risk</u> – The City's investment policy does not place any limit on investments in any single issuer. Five percent or more of the City's investments are in the following:

Investment	Percent
Nagatiskla Cartificates of Danagita	27.63%
Negotiable Certificates of Deposits Federal Home Loan Bank Bonds	43.42%
Federal Home Loan Structured Notes	28.95%
	100.00%

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 3 – RECEIVABLES AND PAYABLES

Income Tax

The City levies a municipal income tax of two and one-half percent on substantially all income earned within the City. Additional increases in the income tax rate require voter approval. City residents pay City income tax on income earned outside the City; however, a 100% credit is allowed for income taxes paid to other municipalities prior to December 31, 2017. Effective January 1, 2018, a reduction factor of 0.90% is applied to income taxes paid to other municipalities. Filing is mandatory for all residents of the City. Employers within the City are required to withhold income tax on employee compensation and remit the tax to the City either monthly or quarterly.

Corporations and other individual taxpayers pay estimated taxes quarterly and file an annual declaration.

Property Taxes

Property taxes include amounts levied against all real, public utility and tangible (used in business) personal property located in the City. Real property taxes are levied each December 31st on the assessed value listed as of the prior December 31st. Assessed values are established by State law at 35% of true value. Property market values are required to be updated every three years and revalued every six years. A revaluation was completed in 2020.

The property tax calendar is as follows:

Levy date December 31, 2020

Lien date December 31, 2020

First installment payment due February 19, 2021

Second installment payment due July 16, 2021

The assessed values for the City at December 31, 2020 were as follows:

 Real Estate
 \$368,475,600

 Tangible Personal Property
 3,024,280

 Total
 \$371,499,880

The County Treasurer collects property taxes on behalf of all taxing districts including the City of Oakwood. The County periodically remits to the City its portion of the taxes collected. Property taxes may be paid on either an annual or semiannual basis.

36

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 3 – RECEIVABLES AND PAYABLES (Continued)

Receivables / Deferred Inflows of Resources

Governmental funds report deferred inflows of resources in connection with receivable for revenues that are not considered available to liquidate liabilities of the current period. The balances at December 31, 2021 were:

		ds						
			Def	Deferred Inflows				
]	Receivables of R		Resources				
Danagatartaria	¢	2 200 514	¢	2 200 514				
Property taxes	\$	2,398,514	\$	2,398,514				
Income taxes		2,807,307		1,606,829				
Accounts receivable		167,909		41,592				
Special assessments		158,926		158,926				
Interest		2,155		1,954				
Intergovenmental		577,618		498,793				
	\$	6,112,429	\$	4,706,608				

Accounts receivable consists of primarily charges for refuse services, sidewalk repair and emergency medical transportation services provided by the City of Oakwood. Special assessments consist of mainly charges for street lighting. Intergovernmental receivables are amounts due to the City from other governmental units, primarily estate and gasoline taxes.

Payables

The balances at December 31, 2021 were:

Governmental Funds Payables

Accounts payable	\$ 65,843
Contracts payable	35,394
Accrued wages	255,905
Intergovernmental	 189,857
	\$ 546,999

The payables and accrued liabilities were primarily for materials and services, payroll and payroll related liabilities that were expensed but the funds had not been disbursed, both due to the normal lag in processing such transactions at year-end.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 4 – CAPITAL ASSETS

Capital asset activity for the year ended December 31, 2021 was as follows:

	Beginning Balance	Additions	Deletions	Ending Balance

NOTE 5 – DEFINED BENEFIT PENSION PLANS

The Statewide retirement systems provide both pension and other postemployment benefits (OPEB).

Net Pension Liability and Net Other Postemployment Benefits (OPEB) Liability (Asset)

Pensions and OPEB are a component of exchange transactions—between an employer and its employees—of salaries and benefits for employee services. Pensions are provided to an employee—on a deferred-payment basis—as part of the total compensation package offered by an employer for employee services each financial period.

The net pension liability and the net OPEB liability (asset) represent the City's proportionate share of each pension/OPEB plan's collective actuarial present value of projected benefit payments attributable to past periods of service, net of each pension/OPEB plan's fiduciary net position. The net pension/OPEB liability (asset) calculation is dependent on critical long-term variables, including estimated average life expectancies, earnings on investments, cost of living adjustments and others. While these estimates use the best information available, unknowable future events require adjusting this estimate annually.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 5 – DEFINED BENEFIT PENSION PLANS (Continued)

Ohio Revised Code limits the City's obligation for this liability to annually required payments. The City cannot control benefit terms or the manner in which pensions/OPEB are financed; however, the City does receive the benefit of employees' services in exchange for compensation including pension and OPEB.

GASB Statements No. 68 and No. 75 assume the liability is solely the obligation of the employer, because (1) they benefit from employee services; and (2) State statute requires funding to come from these employers. All pension contributions to date have come solely from these employers (which also includes pension costs paid in the form of withholdings from employees). The retirement systems may allocate a portion of the employer contributions to provide for these OPEB benefits. In addition, health care plan enrollees may pay a portion of the health care costs in the form of a monthly premium. State statute requires the retirement systems to amortize unfunded pension liabilities within 30 years. If the pension amortization period exceeds 30 years, each retirement system's board must propose corrective action to the State legislature. Any resulting legislative change to benefits or funding could significantly affect the net pension/OPEB liability (asset). Resulting adjustments to the net pension/OPEB liability (asset) would be effective when the changes are legally enforceable. The Ohio Revised Code permits, but does not require the retirement systems to provide healthcare to eligible benefit recipients.

The proportionate share of each plan's unfunded benefits is presented as a long-term net pension/OPEB liability (asset) on the accrual basis of accounting. Any liability for the contractually-required pension/OPEB contribution outstanding at the end of the year is included in accrued wages and benefits on both the accrual and modified accrual bases of accounting.

The remainder of this note includes the required pension disclosures. See Note 6 for the required OPEB disclosures.

Ohio Public Employees Retirement System (OPERS)

Plan Description - City employees, other than full-time public safety officers, participate in the Ohio Public Employees Retirement System (OPERS). OPERS administers three separate pension plans. The traditional pension plan is a cost-sharing, multiple-employer defined benefit pension plan. The member-directed plan is a defined contribution plan and the combined plan is a combination cost-sharing, multiple-employer defined benefit/defined contribution pension plan. Participating employers are divided into state, local, law enforcement and public safety divisions. While members in the state and local divisions may participate in all three plans, law enforcement and public safety divisions exist only within the traditional plan. While employees may elect the member-directed plan or the combined plan, substantially all employees are in the traditional plan; therefore, the following disclosure focuses on the traditional plan.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 5 – DEFINED BENEFIT PENSION PLANS (Continued)

OPERS provides retirement, disability, survivor and death benefits, and annual cost of living adjustments to members of the traditional and combined plans. Authority to establish and amend benefits is provided by Chapter 145 of the Ohio Revised Code. OPERS issues a stand-alone financial report that includes financial statements, required supplementary information and detailed information about OPERS' fiduciary net position that may be obtained by visiting www.opers.org/financial/reports.shtml, by writing to the Ohio Public Employees Retirement System, 277 East Town Street, Columbus, Ohio 43215-4642, or by calling 800-222-7377.

Senate Bill (SB) 343 was enacted into law with an effective date of January 7, 2013. In the legislation, members in the traditional and combined plans were categorized into three groups with varying provisions of the law applicable to each group. The following table provides age and service requirements for retirement and the retirement formula applied to final average salary (FAS) for the three-member groups under the traditional and combined plans as per the reduced benefits adopted by SB 343 (see OPERS Annual Comprehensive Financial Report referenced above for additional information, including requirements for reduced and unreduced benefits):

Group A
Eligible to retire prior to
January 7, 2013 or five years
after January 7, 2013

State and Local Age and Service Requirements:

Age 60 with 60 months of service credit or Age 55 with 25 years of service credit **Traditional Plan Formula:**

2.2% of FAS multiplied by years of service for the first 30 years and 2.5% for service years in excess of 30

Group B

20 years of service credit prior to January 7, 2013 or eligible to retire ten years after January 7, 2013

State and Local

Age and Service Requirements: Age 60 with 60 months of service credit or Age 55 with 25 years of service credit Traditional Plan Formula:

2.2% of FAS multiplied by years of service for the first 30 years and 2.5% for service years in excess of 30

Group C

Members not in other Groups and members hired on or after January 7, 2013

State and Local

Age and Service Requirements: Age 57 with 25 years of service credit

or Age 62 with 5 years of service credit

Traditional Plan Formula:

2.2% of FAS multiplied by years of service for the first 35 years and 2.5% for service years in excess of 35

Final average Salary (FAS) represents the average of the three highest years of earnings over a member's career for Groups A and B. Group C is based on the average of the five highest years of earnings over a member's career.

Members who retire before meeting the age and years of service credit requirement for unreduced benefits receive a percentage reduction in the benefit amount. The initial amount of a member's pension benefit is vested upon receipt of the initial benefit payment for calculation of an annual cost-of-living adjustment.

When a traditional plan benefit recipient has received benefits for 12 months, current law provides for an annual cost of living adjustment (COLA). This COLA is calculated on the base retirement benefit at the date of retirement and is not compounded. Members retiring under the combined plan receive a cost–of–living adjustment on the defined benefit portion of their pension benefit. For those who retired prior to January 7, 2013, the cost of living adjustment is 3 percent. For those retiring on or after January 7, 2013, beginning in calendar year 2019, the adjustment is based

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 5 – DEFINED BENEFIT PENSION PLANS (Continued)

on the average percentage increase in the Consumer Price Index, capped at 3 percent.

Defined contribution plan benefits are established in the plan documents, which may be amended by the Board. Member-directed plan and combined plan members who have met the retirement eligibility requirements may apply for retirement benefits. The amount available for defined contribution benefits in the combined plan consists of the member's contributions plus or minus the investment gains or losses resulting from the member's investment selections. Combined plan members wishing to receive benefits must meet the requirements for both the defined benefit and defined contribution plans. Member-directed participants must have attained the age of 55, have money on deposit in the defined contribution plan and have terminated public service to apply for retirement benefits. The amount available for defined contribution benefits in the member-directed plan consists of the members' contributions, vested employer contributions and investment gains or losses resulting from the members' investment selections. Employer contributions and associated investment earnings vest over a five-year period, at a rate of 20 percent each year. At retirement, members may select one of several distribution options for payment of the vested balance in their individual OPERS accounts. Options include the annuitization of the benefit (which includes joint and survivor options), partial lump-sum payments (subject to limitations), a rollover of the vested account balance to another financial institution, receipt of entire account balance, net of taxes withheld, or a combination of these options. When members choose to annuitize their defined contribution benefit, the annuitized portion of the benefit is reclassified to a defined benefit.

Beginning in 2022, the Combined Plan will be consolidated under the Traditional Pension Plan (defined benefit plan) and the Combined Plan option will no longer be available for new hires beginning in 2022.

Funding Policy - The Ohio Revised Code (ORC) provides statutory authority for member and employer contributions as follows:

	State and Local
2021 Statutory Maximum Contribution Rates	s
Employer	14.00%
Employee (a)	10.00%
2021 Actual Contribution Rates	
Employer:	
Pension (b)	14.00%
Post-employment Health Care Benefits (b)	0.00%
Total Employer	<u>14.00</u> %
Employee	10.00%

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 5 – DEFINED BENEFIT PENSION PLANS (Continued)

- (a) Member contributions within the combined plan are not used to fund the defined benefit retirement allowances.
- (b) These pension and employer health care rates are for traditional and combined plans. The employer contributions rate for the member-directed plan is allocated 4% for health care with the remainder going to pension.

Employer contribution rates are actuarially determined and are expressed as a percentage of covered payroll. For 2021, the City's contractually required contribution was \$598,673, of this amount \$82,891 is reported as an intergovernmental payable.

Ohio Police & Fire Pension Fund (OP&F)

Plan Description - City full-time public safety officers participate in Ohio Police and Fire Pension Fund (OP&F), a cost-sharing, multiple-employer defined benefit pension plan administered by OP&F. OP&F provides retirement and disability pension benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. Benefit provisions are established by the Ohio State Legislature and are codified in Chapter 742 of the Ohio Revised Code. OP&F issues a publicly available financial report that includes financial information and required supplementary information and detailed information about OP&F fiduciary net position. The report that may be obtained by visiting the OP&F website at www.op-f.org or by writing to the Ohio Police and Fire Pension Fund, 140 East Town Street, Columbus, Ohio 43215-5164.

Upon attaining a qualifying age with sufficient years of service, a member of OP&F may retire and receive a lifetime monthly pension. OP&F offers four types of service retirement: normal, service commuted, age/service commuted and actuarially reduced. Each type has different eligibility guidelines and is calculated using the member's average annual salary. The following discussion of the pension formula relates to normal service retirement.

For members hired after July 1, 2013, the minimum retirement age is 52 for normal service retirement with at least 25 years of service credit. For members hired on or before after July 1, 2013, the minimum retirement age is 48 for normal service retirement with at least 25 years of service credit.

The annual pension benefit for normal service retirement is equal to a percentage of the allowable average annual salary. The percentage equals 2.5 percent for each of the first 20 years of service credit, 2.0 percent for each of the next five years of service credit and 1.5 percent for each year of service credit in excess of 25 years. The maximum pension of 72 percent of the allowable average annual salary is paid after 33 years of service credit (see OP&F Annual Comprehensive Financial Report referenced above for additional information, including requirements for

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 5 – DEFINED BENEFIT PENSION PLANS (Continued)

Deferred Retirement Option Plan provisions and reduced and unreduced benefits).

Under normal service retirement, retired members who are at least 55 years old and have been receiving OP&F benefits for at least one year may be eligible for a cost-of-living allowance adjustment. The age 55 provision for receiving a COLA does not apply to those who are receiving a permanent and total disability benefit, surviving beneficiaries, and statutory survivors. Members participating in the DROP program have separate eligibility requirements related to COLA.

The COLA amount for members who have 15 or more years of service credit as of July 1, 2013, and members who are receiving a pension benefit that became effective before July 1, 2013, will be equal to 3.0 percent of the member's base pension benefit.

The COLA amount for members who have less than 15 years of service credit as of July 1, 2013, and members whose pension benefit became effective on or after July 1, 2013, will be equal to a percentage of the member's base pension benefit where the percentage is the lesser of 3.0% or the percentage increase in the consumer price index, if any, over the twelve-month period that ends on the thirtieth day of September of the immediately preceding year, rounded to the nearest one-tenth of one percent.

Members who retired prior to July 24, 1986, or their surviving beneficiaries under optional plans are entitled to cost-of-living allowance increases. The annual increase is paid on July 1st of each year. The annual COLA increase is \$360 under a Single Life Annuity Plan with proportional reductions for optional payment plans.

Funding Policy – The Ohio Revised Code (ORC) provides statutory authority for member and employer contributions as follows:

	Public Safety Officers
2021 Statutory Maximum Contribution F	Rates
Employer	19.50%
Employee	12.25%
2021 Actual Contribution Rates	
Employer:	
Pension	19.00%
Post-employment Health Care Benefits	<u>0.50</u> %
Total Employer	<u>19.50</u> %
Employee	12.25%

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 5 – DEFINED BENEFIT PENSION PLANS (Continued)

Employer contributions are expressed as a percentage of covered payroll. The City's contractually required contribution to OP&F was \$652,368 for 2021. Of this amount \$90,704 is reported as an intergovernmental payable.

<u>Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions</u>

The net pension liability for OPERS was measured as of December 31, 2020, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. OP&F's total pension liability was measured as of December 31, 2020, and was determined by rolling forward the total pension liability as of January 1, 2020, to December 31, 2020. The City's proportion of the net pension liability was based on the City's share of contributions to the pension plan relative to the contributions of all participating entities. Following is information related to the proportionate share of the City's defined benefit pension plans:

	OPERS		
	Traditional Plan	OP&F	<u>Total</u>
Proportionate share of the Net			
Pension Liability	\$ 4,383,116	\$ 8,439,148	\$ 12,822,264
Proportion of the Net Pension Liability			
Current Measurement Date	0.0296000%	0.1237940%	
Proportion of the Net Pension Liability			
Prior Measurement Date	0.0286860%	0.1239443%	
Change in Proportionate Share	0.0009140%	-0.0001503%	
Pension Expense	\$ 133,781	\$ 655,947	\$ 789,728
±		. ,	

At December 31, 2021, the City reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	OPERS itional Plan	OP&F	<u>Total</u>
Deferred Outflows of resources:			
Differences between expected and actual experience	\$ -	\$ 352,785	\$ 352,785
Changes in assumptions	-	141,529	141,529
Changes in employer proportionate share of net			
pension liability	125,852	160,267	286,119
Contributions subsequent to the measurement date	 598,673	 652,368	 1,251,041
Total Deferred Outflows of Resources	\$ 724,525	\$ 1,306,949	\$ 2,031,474

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 5 – DEFINED BENEFIT PENSION PLANS (Continued)

		OPERS		
	Trac	litional Plan	OP&F	<u>Total</u>
Deferred Inflows of resources:				
Differences between expected and actual experience	\$	183,349	\$ 328,764	\$ 512,113
Net difference between projected and actual earnings				
on pension plan investments		1,708,410	409,355	2,117,765
Changes in employer proportionate share of net				
pension liability		3,294	75,810	79,104
Total Deferred Inflows of Resources	\$	1,895,053	\$ 813,929	\$ 2,708,982

\$1,251,041 reported as deferred outflows of resources related to pension resulting from contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ending December 31, 2022. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pension will be recognized in pension expense as follows:

		OPERS		
Year Ending December 31:	Tra	<u>ditional Plan</u>	OP&F	<u>Total</u>

Actuarial Assumptions – OPERS

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and cost trends. Actuarially determined amounts are subject to continual review or modification as actual results are compared with past expectations and new estimates are made about the future.

Projections of benefits for financial-reporting purposes are based on the substantive plan (the plan as understood by the employers and plan members) and include the types of benefits provided at the time of each valuation. The total pension liability was determined by an actuarial valuation as of December 31, 2020, using the following actuarial assumptions applied to all periods included in the measurement in accordance with the requirements of GASB 67. Key methods and assumptions used in the latest actuarial valuation, reflecting experience study results, prepared as of December 31, 2020, are presented below.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 5 – DEFINED BENEFIT PENSION PLANS (Continued)

Wage Inflation
Future Salary Increases,

<u>Traditional Plan</u>

3.25%

3.25% - 10.75%

(including wage inflation)

3.00%, simple 0.50%, simple through 2021, then 2.15%, simple 7.20% Individual Entry Age

In October 2020, the OPERS Board adopted a change in COLA for Post-January 7, 2013 retirees, changing it from 1.4 percent simple through 2020 then 2.15 simple to .5 percent simple through 2021 then 2.15 percent simple.

Pre-retirement mortality rates are based on the RP-2014 Employees mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Post-retirement mortality rates are based on the RP-2014 Healthy Annuitant mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Post-retirement mortality rates for disabled retirees are based on the RP-2014 Disabled mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Mortality rates for a particular calendar year are determined by applying the MP-2015 mortality improvement scale to all of the above described tables.

The most recent experience study was completed for the five-year period ended December 31, 2015.

The allocation of investment assets with the Defined Benefit portfolio is approved by the Board of Trustees as outlined in the annual investment plan. Plan assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the defined benefit pension plans. The long-term expected rate of return on defined benefit investment assets was determined using a building-block method in which best-estimate ranges of expected future real rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected real rate of return by weighting the expected future real rates of return by the target asset allocation percentage, adjusted for inflation. Best estimates of arithmetic real rates of return were provided by the Board's investment consultant. For each major asset class that is

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 5 – DEFINED BENEFIT PENSION PLANS (Continued)

included in the Defined Benefit portfolio's target asset allocation as of December 31, 2020, these best estimates are summarized in the following table:

	Weighted Average		
		Long-Term Expected	
	Target	Real Rate of Return	
Asset Class	<u>Allocation</u>	(Arithmetic)	
Fixed Income	25.00%	1.32%	
Domestic Equities	21.00%	5.64%	
Real Estate	10.00%	5.39%	
Private Equity	12.00%	10.42%	
International Equities	23.00%	7.36%	
Other investments	9.00%	4.75%	
Total	100.00%	5.43%	

Discount Rate - The discount rate used to measure the total pension liability was 7.2 percent for the traditional plan and the combined plan. The projection of cash flows used to determine the discount rate assumed that contributions from plan members and those of the contributing employers are made at the contractually required rates, as actuarially determined. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefits payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments for the traditional pension plan, combined plan and member-directed plan was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Proportionate Share of the Net Pension Liability (Asset) to Changes in the Discount Rate – The following table presents the City's proportionate share of the net pension liability (asset) calculated using the current period discount rate assumption of 7.2 percent, as well as what the City's proportionate share of the net pension liability (asset) would be if it were calculated using a discount rate that is one-percentage-point lower (6.2 percent) or one-percentage-point higher (8.2 percent) than the current rate:

		Current	
	1% Decrease	Discount Rate	1% Increase
	(6.20%)	<u>(7.20%)</u>	<u>(8.20%)</u>
Proportionate share of the net pension liability	\$ 8,360,816	\$ 4,383,116	\$ 1,075,664

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 5 – DEFINED BENEFIT PENSION PLANS (Continued)

Changes from the Measurement Date to the Report Date - During 2021, the OPERS Board lowered the investment rate of return from 7.2 percent to 6.9 percent along with certain other changes to assumptions for the actuarial valuation as of December 31, 2021. The effects of these changes are unknown.

Actuarial Assumptions - OP&F

OP&F's total pension liability as of December 31, 2020, is based on the results of an actuarial valuation date of January 1, 2020, and rolled-forward using generally accepted actuarial procedures. The total pension liability is determined by OP&F's actuaries in accordance with GASB Statement No. 67, as part of their annual valuation. Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, salary increases, disabilities, retirements and employment terminations. Actuarially determined amounts are subject to continual review and potential modifications, as actual results are compared with past expectations and new estimates are made about the future. Assumptions considered are: withdrawal rates, disability retirement, service retirement, DROP elections, mortality, percent married and forms of the payment, DROP interest rate, CPI-based COLA, investment returns, salary increases and payroll growth.

Key methods and assumptions used in the latest actuarial valuation, reflecting experience study results, prepared as of January 1, 2020, are presented below.

Valuation Date

Actuarial Cost Method Investment Rate of Return Projected Salary Increases Payroll Growth

Cost-of-Living Adjustments

78 and up	115.00%

Mortality for disabled retirees is based on the RP-2014 Disabled Mortality Tables rolled back to 2006, adjusted according to the rates in the following table, and projected with the Buck Modified 2016 Improvement Scale.

<u>Age</u>	Safety Officer
59 or less	35.00%
60 - 69	60.00%
70 - 79	75.00%
80 and up	100.00%

The most recent experience study was completed for the five-year period ended December 31, 2016.

The long-term expected rate of return on pension plan investments was determined using a building-block approach and assumes a time horizon, as defined in the Statement of Investment Policy. A forecasted rate of inflation serves as the baseline for the return expected. Various real return premiums over the baseline inflation rate have been established for each asset class. The long-term expected nominal rate of return has been determined by calculating a weighted averaged of the expected real return premiums for each asset class, adding the projected inflation rate and adding the expected return from rebalancing uncorrelated asset classes. Best estimates of the long-term expected geometric real rates of return for each major asset class included in OP&F's target asset allocation as of December 31, 2020, are summarized below:

	Target	Long-Term Expected
Asset Class	Allocation	Real Rate of Return
Cash and Cash Equivalents	0.00%	0.00%
Domestic Equity	21.00%	4.10%
Non-US Equity	14.00%	4.80%
Private Markets	8.00%	6.40%
Core Fixed Income*	23.00%	0.90%
High Yield Fixed Income	7.00%	3.00%

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 5 – DEFINED BENEFIT PENSION PLANS (Continued)

	Target	Long-Term Expected
Asset Class	Allocation	Real Rate of Return
Private Credit	5.00%	4.50%
U.S. Inflation Linked Bonds*	17.00%	0.70%
Midstream Energy Infrastructure	5.00%	5.60%
Real Assets	8.00%	5.80%
Gold	5.00%	1.90%
Private Real Estate	12.00%	5.30%
Total	125.00%	

Note: Assumptions are geometric

OP&F's Board of Trustees has incorporated the risk parity concept into OP&F's asset liability valuation with the goal of reducing equity risk exposure, which reduces overall Total Portfolio risk without sacrificing return, and creating a more risk-balanced portfolio based on their relationship between asset classes and economic environments. From the notional portfolio perspective above, the Total Portfolio may be levered up to 1.25 times due to the application of leverage in certain fixed income asset classes.

Discount Rate - The total pension liability was calculated using the discount rate of 8.00 percent. The projection of cash flows used to determine the discount rate assumed the contributions from employers and from the members would be computed based on contribution requirements as stipulated by State statute. Projected inflows from investment earning were calculated using the longer-term assumed investment rate of return of 8.00 percent. Based on those assumptions, the plan's fiduciary net position was projected to be available to make all future benefit payments of current plan members. Therefore, a long-term expected rate of return on pension plan investments was applied to all periods of projected benefits to determine the total pension liability.

Sensitivity of the Proportionate Share of the Net Pension Liability to Changes in the Discount Rate - Net pension liability is sensitive to changes in the discount rate, and to illustrate the potential impact, the following table presents the net pension liability calculated using the discount rate of 8.00 percent, as well as what the net pension liability would be if it were calculated using a discount rate that is one percentage point lower (7.00 percent), or one percentage point higher (9.00 percent) than the current rate.

NOTE 6 – POST EMPLOYMENT BENEFITS

See Note 5 for a description of the net OPEB liability (asset).

Ohio Public Employees Retirement System OPEB

Health Care Plan Description - The Ohio Public Employees Retirement System (OPERS) administers three separate pension plans: the traditional pension plan, a cost-sharing, multiple-employer defined benefit pension plan; the member-directed plan, a defined contribution plan; and the combined plan, a cost-sharing, multiple-employer defined benefit pension plan that has elements of both a defined benefit and defined contribution plan.

OPERS maintains a cost-sharing, multiple-employer defined benefit post-employment health care trust, which funds multiple health care plans including medical coverage, prescription drug coverage and deposits to a Health Reimbursement Arrangement (HRA) to qualifying benefit recipients of both the traditional pension and the combined plans. Currently, Medicare-eligible retirees are able to select medical and prescription drug plans from a range of options and may elect optional vision and dental plans. Retirees and eligible dependents enrolled in Medicare Parts A and B have the option to enroll in a Medicare supplemental plan with the assistance of the OPERS Medicare Connector. The OPERS Medicare Connector is a relationship with a vendor selected by OPERS to assist retirees, spouses and dependents with selecting a medical and pharmacy plan. Monthly allowances, based on years of service and the age at which the retiree first enrolled in OPERS coverage, are deposited into an HRA. For non-Medicare retirees and eligible dependents, OPERS sponsors medical and prescription coverage through a professionally managed self-insured plan. An allowance to offset a portion of the monthly premium is offered to retirees and eligible dependents. The allowance is based on the retiree's years of service and age when they first enrolled in OPERS coverage.

Medicare-eligible retirees who choose to become re-employed or survivors who become employed in an OPERS-covered position are prohibited from participating in an HRA. For this group of retirees, OPERS sponsors secondary coverage through a professionally managed self-insured program. Retirees who enroll in this plan are provided with a monthly allowance to offset a portion of the monthly premium. Medicare-eligible spouses and dependents can also enroll in this plan as long as the retiree is enrolled.

OPERS provides a monthly allowance for health care coverage for eligible retirees and their eligible dependents. The base allowance is determined by OPERS.

The heath care trust is also used to fund health care for member-directed plan participants, in the form of a Retiree

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 6 – POST EMPLOYMENT BENEFITS (Continued)

Medical Account (RMA). At retirement or separation, member directed plan participants may be eligible for reimbursement of qualified medical expenses from their vested RMA balance.

Effective January 1, 2022, OPERS will discontinue the group plans currently offered to non-Medicare retirees and re-employed retirees. Instead, eligible non-Medicare retirees will select an individual medical plan. OPERS will provide a subsidy or allowance via an HRA allowance to those retirees who meet health care eligibility requirements. Retirees will be able to seek reimbursement for plan premiums and other qualified medical expenses. These changes are reflected in the December 31, 2020, measurement date health care valuation.

In order to qualify for postemployment health care coverage, age and service retirees under the traditional pension and combined plans must have twenty or more years of qualifying Ohio service credit with a minimum age of 60, or generally 30 years of qualifying service at any age. Health care coverage for disability benefit recipients and qualified survivor benefit recipients is available. Current retirees eligible (or who become eligible prior to January 1, 2022) to participate in the OPERS health care program will continue to be eligible after January 1, 2022. Eligibility requirements will change for those retiring after January 1, 2022, with differing eligibility requirements for Medicare retirees and non-Medicare retirees. The health care coverage provided by OPERS meets the definition of an Other Post Employment Benefit (OPEB) as described in GASB Statement No. 75. See OPERS' Annual Comprehensive Financial Report referenced below for additional information.

The Ohio Revised Code permits, but does not require OPERS to provide health care to its eligible benefit recipients. Authority to establish and amend health care coverage is provided to the Board in Chapter 145 of the Ohio Revised Code.

Disclosures for the health care plan are presented separately in the OPERS financial report. Interested parties may obtain a copy by visiting www.opers.org/financial/reports.shtml, by writing to OPERS, 277 East Town Street, Columbus, Ohio 43215-4642, or by calling (614) 222-5601 or 800-222-7377.

Funding Policy - The Ohio Revised Code provides the statutory authority allowing public employers to fund postemployment health care through their contributions to OPERS. When funding is approved by OPERS' Board of Trustees, a portion of each employer's contribution to OPERS is set aside to fund OPERS health care plans. Beginning in 2018, OPERS no longer allocated a portion of its employer contributions to health care for the traditional plan and the combined plan.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 6 – POST EMPLOYMENT BENEFITS (Continued)

Employer contribution rates are expressed as a percentage of the earnable salary of active members. In 2021, state and local employers contributed at a rate of 14.0 percent of earnable salary and public safety and law enforcement employers contributed at 18.1 percent. These are the maximum employer contribution rates permitted by the Ohio Revised Code. Active member contributions do not fund health care.

Each year, the OPERS Board determines the portion of the employer contribution rate that will be set aside to fund health care plans. For 2021, OPERS did not allocate any employer contribution to health care for members in the Traditional Pension Plan and Combined Plan. The OPERS Board is also authorized to establish rules for the retiree or their surviving beneficiaries to pay a portion of the health care provided. Payment amounts vary depending on the number of covered dependents and the coverage selected. The employer contribution as a percentage of covered payroll deposited into the RMA for participants in the member-directed plan for 2021 was 4.0 percent.

Employer contribution rates are actuarially determined and are expressed as a percentage of covered payroll. The City's contractually required contribution was \$0 for 2021.

Ohio Police and Fire Pension Fund OPEB

Health Care Plan Description - The City contributes to the Ohio Police and Fire Pension Fund (OP&F) sponsored healthcare program, a cost-sharing, multiple-employer defined post-employment health care plan administered by a third-party provider. This program is not guaranteed and is subject to change at any time upon action of the Board of Trustees. On January 1, 2019, OP&F implemented a new model for health care. Under this new model, OP&F provides eligible retirees with a fixed stipend earmarked to pay for health care and Medicare Part B reimbursements.

OP&F contracted with a vendor who assists eligible retirees in choosing health care plans that are available where they live (both Medicare-eligible and pre-65 populations). A stipend funded by OP&F is available to these members through a Health Reimbursement Arrangement and can be used to reimburse retirees for qualified health care expenses.

A retiree is eligible for the OP&F health care stipend unless they have access to any other group coverage including employer and retirement coverage. The eligibility of spouses and dependent children could increase the stipend amount. If the spouse or dependents have access to any other group coverage including employer or retirement coverage, they are not eligible for stipend support from OP&F. Even if an OP&F member or their dependents are not eligible for a stipend, they can use the services of the third-party administrator to select and enroll in a plan. The

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 6 – POST EMPLOYMENT BENEFITS (Continued)

stipend provided by OP&F meets the definition of an Other Post Employment Benefit (OPEB) as described in Governmental Accounting Standards Board (GASB) Statement No. 75.

OP&F maintains funds for health care in two separate accounts: one account for health care benefits and one account for Medicare Part B reimbursements. A separate health care trust accrual account is maintained for health care benefits under IRS Code Section 115 trust. IRS Code Section 401(h) account is maintained for Medicare Part B reimbursements.

The Ohio Revised Code allows, but does not mandate, OP&F to provide OPEB benefits. Authority for the OP&F Board of Trustees to provide health care coverage to eligible participants and to establish and amend benefits is codified in Chapter 742 of the Ohio Revised Code.

OP&F issues a publicly available financial report that includes financial information and required supplementary information for the plan. The report may be obtained by visiting the OP&F website at www.op-f.org or by writing to the Ohio Police and Fire Pension Fund, 140 East Town Street, Columbus, Ohio 43215-5164.

Funding Policy - The Ohio Revised Code provides for contribution requirements of the participating employers and of plan members to the OP&F defined benefit pension plan. Participating employers are required to contribute to the pension plan at rates expressed as percentages of the payroll of active pension plan members, currently 19.5 percent and 24 percent of covered payroll for police and fire employer units, respectively. The Ohio Revised Code states that the employer contribution may not exceed 19.5 percent of covered payroll for police employer units and 24 percent of covered payroll for fire employer units. Active members do not make contributions to the OPEB Plan.

The Board of Trustees is authorized to allocate a portion of the total employer contributions for retiree health care benefits. For 2021, the portion of employer contributions allocated to health care was 0.5 percent of covered payroll. The amount of employer contributions allocated to the health care plan each year is subject to the Trustees' primary responsibility to ensure that pension benefits are adequately funded.

The OP&F Board of Trustees is also authorized to establish requirements for contributions to the health care plan by retirees and their eligible dependents or their surviving beneficiaries. Payment amounts vary depending on the number of covered dependents and the coverage selected.

The City's contractually required contribution to OP&F was \$17,168 for 2021.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 6 – POST EMPLOYMENT BENEFITS (Continued)

Net OPEB Liability (Asset)

The net OPEB liability (asset) and total OPEB liability (asset) for OPERS were determined by an actuarial valuation as of December 31, 2019, rolled forward to the measurement date of December 31, 2020, by incorporating the expected value of health care cost accruals, the actual health care payment, and interest accruals during the year. OP&F's total OPEB liability was measured as of December 31, 2020, and was determined by rolling forward the total OPEB liability as of January 1, 2020, to December 31, 2020. The City's proportion of the net OPEB liability (asset) was based on the City's share of contributions to the retirement plan relative to the contributions of all participating entities. Following is information related to the proportionate share:

	Tr	OPERS aditional Plan		OP&F	<u>Total</u>
Proportionate share of the					
Net OPEB (Asset)	\$	(514,966)	\$	-	\$ (514,966)
Net OPEB Liability		-		1,311,618	1,311,618
Proportion of the Net OPEB Liability/Asset:					
Current Measurement Date		0.02890500%	0.1	2379400%	
Prior Measurement Date		<u>0.02812000</u> %	0.1	2394430%

Actuarial Assumptions – OPERS

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and cost trends. Actuarially determined amounts are subject to continual review or modification as actual results are compared with past expectations and new estimates are made about the future.

Projections of health care costs for financial reporting purposes are based on the substantive plan (the plan as understood by the employers and plan members) and include the types of coverage provided at the time of each valuation and the historical pattern of sharing of costs between OPERS and plan members. The total OPEB asset was determined by an actuarial valuation as of December 31, 2019, rolled forward to the measurement date of December 31, 2020. The actuarial valuation used the following actuarial assumptions applied to all prior periods included in the measurement in accordance with the requirements of GASB Statement No. 74:

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

Prior Measurement Date 10.50% initial, 3.50% ultimate in 2030
Actuarial Cost Method Individual Entry Age, Normal

Pre-retirement mortality rates are based on the RP-2014 Employees mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Postretirement mortality rates are based on the RP-2014 Healthy Annuitant mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Postretirement mortality rates for disabled retirees are based on the RP-2014 Disabled mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Mortality rates for a particular calendar year are determined by applying the MP-2015 mortality improvement scale to all of the above described tables.

The most recent experience study was completed for the five-year period ended December 31, 2015.

The allocation of investment assets within the Health Care portfolio is approved by the Board of Trustees as outlined in the annual investment plan. Assets are managed on a total return basis with a long-term objective of continuing to offer a sustainable health care program for current and future retirees. OPERS' primary goal is to achieve and maintain a fully funded status for the benefits provided through the defined pension plans. Health care is a discretionary benefit. The long-term expected rate of return on health care investment assets was determined using a building-block method in which best-estimate ranges of expected future real rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected real rate of return by

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 6 – POST EMPLOYMENT BENEFITS (Continued)

weighting the expected future real rates of return by the target asset allocation percentage, adjusted for inflation. Best estimates of arithmetic rates of return were provided by OPERS investment consultant. For each major asset class that is included in the Health Care's portfolio's target asset allocation as of December 31, 2020, these best estimates are summarized in the following table:

		Weighted Average
		Long Term Expected
	Target	Real Rate of Return
Asset Class	Allocation	(Arithmetic)
Fixed Income	34.00%	1.07%
Domestic Equities	25.00%	5.64%
Real Estate Investment Trust	7.00%	6.48%
International Equities	25.00%	7.36%
Other investments	9.00%	4.02%
Total	100.00%	4.43%

Discount Rate - A single discount rate of 6.0 percent was used to measure the OPEB liability on the measurement date of December 31, 2020. A single discount rate of 3.16 percent was used to measure the OPEB liability on the measurement date of December 31, 2019. Projected benefit payments are required to be discounted to their actuarial present value using a single discount rate that reflects (1) a long-term expected rate of return on OPEB plan investments (to the extent that the health care fiduciary net position is projected to be sufficient to pay benefits), and (2) tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that the contributions for use with the long-term expected rate are not met). This single discount rate was based on an expected rate of return on the health care investment portfolio of 6.00 percent and a municipal bond rate of 2.00 percent (Fidelity Index's "20-Year Municipal GO AA Index"). The projection of cash flows used to determine this single discount rate assumed that employer contributions will be made at rates equal to the actuarially determined contribution rate. Based on these assumptions, the health care fiduciary net position and future contributions were sufficient to finance health care costs through 2120. As a result, the actuarial assumed long-term expected rate of return on health care investments was applied to projected costs through the year 2120, the duration of the projection period through which projected health care payments are fully funded.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 6 – POST EMPLOYMENT BENEFITS (Continued)

Sensitivity of the City's Proportionate Share of the Net OPEB Liability (Asset) to Changes in the Discount Rate – The following table presents the City's proportionate share of the net OPEB asset calculated using the single discount rate of 6.00 percent, as well as what the City's proportionate share of the net OPEB liability would be if it were calculated using a discount rate that is one-percentage-point lower (5.00 percent) or one-percentage-point higher (7.00 percent) than the current rate:

	Current					
	1.0	0% Decrease (5.00%)		scount Rate (6.00%)	1.0	0% Increase (7.00%)
Proportionate share of the net OPEB (asset)	\$	(128,049)	\$	(514,966)	\$	(833,042)

Sensitivity of the Proportionate Share of the Net OPEB Asset to Changes in the Health Care Cost Trend Rate - Changes in the health care cost trend rate may also have a significant impact on the net OPEB asset. The following table presents the net OPEB asset calculated using the assumed trend rates, and the expected net OPEB liability if it were calculated using a health care cost trend rate that is 1.0 percent lower or 1.0 percent higher than the current rate.

Retiree health care valuations use a health care cost-trend assumption that changes over several years built into the assumption. The near-term rates reflect increases in the current cost of health care; the trend starting in 2021 is 8.5 percent. If this trend continues for future years, the projection indicates that years from now virtually all expenditures will be for health care. A more reasonable alternative is the health plan cost trend will decrease to a level at, or near, wage inflation. On this basis, the actuaries project premium rate increases will continue to exceed wage inflation for approximately the next decade, but by less each year, until leveling off at an ultimate rate, assumed to be 3.5 percent in the most recent valuation.

	Current Health Care Cost Trend Rate					
	1.00	0% Decrease	<u>A</u>	ssumption	1.00	0% Increase
Proportionate share of the net OPEB (asset)	\$	(527,516)	\$	(514,966)	\$	(500,924)

Changes between Measurement Date and Reporting Date - During 2021, the OPERS Board made various changes to assumptions for the actuarial valuation as of December 31, 2021. The effects of these changes are unknown.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 6 – POST EMPLOYMENT BENEFITS (Continued)

Actuarial Assumptions - OP&F

OP&F's total OPEB liability as of December 31, 2020, is based on the results of an actuarial valuation date of

January 1, 2020, and rolled-forward using generally accepted actuarial procedures. The total OPEB liability is

determined by OP&F's actuaries in accordance with GASB Statement No. 74, as part of their annual valuation.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about

probability of occurrence of events far into the future. Examples include assumptions about future employment,

mortality, salary increases, disabilities, retirements and employment terminations. Actuarially determined amounts

are subject to continual review and potential modifications, as actual results are compared with past expectations and

new estimates are made about the future.

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by

the employers and plan members) and include the types of benefits provided at the time of each valuation and the

historical pattern of sharing benefit costs between the employers and plan members to that point. The projection of

benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual

funding limitations.

Actuarial calculations reflect a long-term perspective. For a newly hired employee, actuarial calculations will take

into account the employee's entire career with the employer and also take into consideration the benefits, if any,

paid to the employee after termination of employment until the death of the employee and any applicable contingent

annuitant. In many cases, actuarial calculations reflect several decades of service with the employer and the

payment of benefits after termination.

Key methods and assumptions used in the latest actuarial valuation, reflecting experience study results, are

presented below.

NOTE 6 – POST EMPLOYMENT BENEFITS (Continued)

Mortality for non-disabled participants is based on the RP-2014 Total Employee and Healthy Annuitant Mortality Tables rolled back to 2006, adjusted according to the rates in the following table, and projected with the Buck Modified 2016 Improvement Scale. Rates for surviving beneficiaries are adjusted by 120 percent.

<u>Age</u>	Safety Officer
67 or less	77.00%
68 - 77	105.00%
78 and up	115.00%

Mortality for disabled retirees is based on the RP-2014 Disabled Mortality Tables rolled back to 2006, adjusted according to the rates in the following table, and projected with the Buck Modified 2016 Improvement Scale.

<u>Age</u>	Safety Officer
59 or less	35.00%
60 - 69	60.00%
70 - 79	75.00%
80 and up	100.00%

The most recent experience study was completed for the five-year period ended December 31, 2016.

The long-term expected rate of return on OPEB plan investments was determined using a building-block approach and assumes a time horizon, as defined in the Statement of Investment Policy. A forecasted rate of inflation serves as the baseline for the return expected. Various real return premiums over the baseline inflation rate have been established for each asset class. The long-term expected nominal rate of return has been determined by calculating a weighted averaged of the expected real return premiums for each asset class, adding the projected inflation rate and adding the expected return from rebalancing uncorrelated asset classes. Best estimates of the long-term expected geometric real rates of return for each major asset class included in OP&F's target asset allocation as of December 31, 2020, are summarized below:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Cash and Cash Equivalents	0.00%	0.00%
Domestic Equity	21.00%	4.10%
Non-US Equity	14.00%	4.80%
Private Markets	8.00%	6.40%

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 6 – POST EMPLOYMENT BENEFITS (Continued)

	Target	Long-Term Expected
Asset Class	Allocation	Real Rate of Return
Core Fixed Income*	23.00%	0.90%
High Yield Fixed Income	7.00%	3.00%
Private Credit	5.00%	4.50%
U.S. Inflation Linked Bonds*	17.00%	0.70%
Midstream Energy Infrastructure	5.00%	5.60%
Real Assets	8.00%	5.80%
Gold	5.00%	1.90%
Private Real Estate	12.00%	5.30%
Total	125.00%	

Note: Assumptions are geometric

OP&F's Board of Trustees has incorporated the risk parity concept into OP&F's asset liability valuation with the goal of reducing equity risk exposure, which reduces overall Total Portfolio risk without sacrificing return, and creating a more risk-balanced portfolio based on the relationship between asset classes and economic environments. From the notional portfolio perspective above, the Total Portfolio may be levered up to 1.2 times due to the application of leverage in certain fixed income asset classes.

Discount Rate - For 2020, the total OPEB liability was calculated using the discount rate of 2.96 percent. For 2019, the total OPEB liability was calculated using the discount rate of 3.56 percent. The projection of cash flows used to determine the discount rate assumed the contribution from employers and from members would be computed based on contribution requirements as stipulated by State statute. Projected inflows from investment earnings were calculated using the longer-term assumed investment rate of return of 8 percent. Based on those assumptions, OP&F's fiduciary net position was projected to not be able to make all future benefit payments of current plan members. Therefore, a municipal bond rate of 2.12 percent at December 31, 2020 and 2.75 percent at December 31, 2019, was blended with the long-term rate of 8 percent, which resulted in a blended discount rate of 2.96 percent for 2020 and 3.56 percent for 2019. The municipal bond rate was determined using the Bond Buyers General Obligation 20-year Municipal Bond Index Rate. The OPEB plan's fiduciary net position was projected to be available to make all projected OPEB payments until 2037. The long-term expected rate of return on health care investments was applied to projected costs through 2037, and the municipal bond rate was applied to all health care costs after that date.

^{*} Levered 2x

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 6 – POST EMPLOYMENT BENEFITS (Continued)

Sensitivity of the Proportionate Share of the Net OPEB Liability to Changes in the Discount Rate - Net OPEB liability is sensitive to changes in the discount rate, and to illustrate the potential impact the following table presents the net OPEB liability calculated using the discount rate of 2.96 percent, as well as what the net OPEB liability would be if it were calculated using a discount rate that is one percentage point lower (1.96 percent), or one percentage point higher (3.96 percent) than the current rate.

Current
1.00% Decrease Discount Rate 1.00% Increase
(1.96%) (2.96%) (3.96%)

Proportionate share of the net OPEB liability \$ 1,635,512 \$ 1,311,618 \$ 1,044,443

Sensitivity of the Proportionate Share of the Net OPEB Liability to Changes in the Health Care Cost Trend Rate - The total OPEB liability is based on a medical benefit that is a flat dollar amount; therefore, it is unaffected by a health care cost trend rate. An increase or decrease in the trend rate would have no effect on the total OPEB liability.

Other Employee Benefits - Compensated Absences:

Accumulated Unpaid Vacation and Sick Leave

City employees earn vacation leave at varying rates based upon length of service. In the case of death or retirement, an employee (or their estate) is paid for the unused vacation leave. The total obligation for vacation leave for the City amounted to \$612,283 at December 31, 2021.

City employees earn sick leave at a rate of 10 hours per month. A maximum of 150 days of sick leave can be carried forward from year to year.

Any employee hired before December 31, 2011 and all union employees who retire under the provisions of the Ohio Public Employees Retirement System or the Ohio Police and Fire Pension Fund, or any other plan of the State of Ohio or the City of Oakwood, will be compensated for accumulated sick leave of sixty (60) days or more, upon the basis of one day's pay for every three (3) days sick leave. If an employee has accumulated one hundred twenty (120) days of sick leave or more, the employee or his beneficiary will be compensated at retirement or death at one day's pay for each two (2) days of sick leave, on the same terms as outlined above, but in place of the formula outlined above.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 6 – POST EMPLOYMENT BENEFITS (Continued)

Non-union city employees hired after December 31, 2011 and who retire under the provisions of the Ohio Public Employees Retirement System or the Ohio Police and Fire Pension Fund, or any other plan of the State of Ohio or the City of Oakwood, will be compensated for accumulated sick leave of sixty (60) days or more, upon the basis of one day's pay for every three (3) days sick leave.

The total obligation for the sick leave accrual for the City amounted to \$1,172,607 at December 31, 2021.

NOTE 7 – OTHER COMMITMENTS

Encumbrance accounting is utilized to the extent necessary to assure effective budgetary control and accountability and to facilitate effective cash planning and control. At year end the amount of encumbrances expected to be honored upon performance by the vendor in the next year were as follows:

General fund	\$ 130,414
Health district fund	3,350
Other governmental funds	922,385
Fiduciary funds	37,559
Internal Service Funds	77,720
Enterprise Funds	 621,268
Total	\$ 1,792,696

NOTE 8 – TRANSFERS

The following is a summary of transfers in and out for all funds in 2021:

<u>Fund</u>	<u>T</u>	ransfers-in	<u>Tr</u>	ansfers-out
General Health district Other governmental	\$ \$	- - 1,923,491	\$ \$	1,923,491 - -
Total transfers	\$	1,923,491	\$	1,923,491

All interfund transfers are routine in nature and are to subsidize the operations of the applicable fund.

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 9 – CONTINGENT LIABILITIES

Amounts received or receivables from grant agencies are subject to audit and adjustment by grantor agencies, principally the Federal or State governments. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount, if any, of expenditures that may be disallowed by the grantor cannot be determined at this time, although the City expects such amounts, if any, to be immaterial.

The City is named in a variety of lawsuits in the course of its normal governmental operations. Liability, if any, which might result from these proceedings would not, in the opinion of management and legal counsel, have a material effect on the position of the City.

NOTE 10-LONG-TERM OBLIGATIONS AND OTHER FINANCING ARRANGEMENTS

Compensated absences will be paid from the fund in which the employee who has earned the leave is paid.

There is no repayment schedule for the net pension and OPEB liabilities; however, employer contributions are made from the fund benefiting from related employees' services.

Legal Debt Margin

The City Charter provides that the total net debt of the municipal corporation, whether or not approved by the electors, shall not exceed 7.50% of the total value of all property in the municipal corporation as listed and assessed for taxation. In addition, the unvoted net debt of the municipal corporation cannot exceed 2.50% of the total value of all property in the municipal corporation as listed and assessed for taxation. As of December 31, 2021, the City had legal debt margin for total debt of \$27,862,491 and a legal debt margin for unvoted debt of \$9,287,497.

NOTE 11 – RISK MANAGEMENT

The City is exposed to various risks of losses related to torts; thefts of, damage to, and destruction of assets, errors and omissions, and natural disasters. The City secures general liability, property and automobile coverage through the Ohio Plan Risk Management, Inc. (OPRM). OPRM coverage programs are developed specific to each member's risk management needs and the related premiums for coverage are determined through the application of uniform underwriting criteria addressing the member's exposure to loss. Effective November 1, 2012, the OPRM increased its retention to 50% of the first \$250,000 casualty treaty. Effective November 1, 2014, the OPRM's retention decreased to 47% of the first \$250,000 casualty treaty. Effective November 1, 2016, the OPRM's casualty retention

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 11 – RISK MANAGEMENT (Continued)

increased to 50% of the first \$250,000 casualty treaty. Also, effective November 1, 2016, the Plan's property retention increased to 30% of the first \$1,000,000 property treaty. Corresponding with the property retention increase, the OPRM also elected to purchase a complementary excess layer within the property quota share treaty. The complementary excess will respond by reimbursing the OPRM 30% of the loss value that exceeds \$200,000. Effective November 1, 2017 the OPRM's retention decreased to 47% of the first \$250,000 casualty treaty. Effective November 1, 2018 the OPRM's retention increased to 100% of the first \$250,000 casualty treaty. The Plan's property retention remained unchanged from the prior 2 years. Effective November 1, 2019, the Plan's casualty retention remained unchanged. The Plan's property retention increased to 33% of the first \$1,000,000 property treaty from 30% the prior two treaties. A complementary excess treaty will respond by reimbursing the OPRM 33% of the loss value between \$200,000 and \$1,000,000. Effective November 1, 2020, the Plan's casualty retention remains unchanged and the Plan's property retention increased to 55% of the first \$1,000,000 property treaty. A complementary excess treaty will respond by reimbursing the OPRM 55% of the loss value between \$200,000 and \$1,000,000. Effective November 1, 2021, the Plan's casualty retention remains unchanged and the Plan's property retention increased to 65% of the first \$1,000,000 property treaty. A complementary excess treaty will respond by reimbursing the OPRM 65% of the loss value between \$200,000 and \$1,000,000. Members are only responsible for their self-retention (deductible) amounts, which vary from member to member. The City pays an annual premium to OPRM for this coverage. Insurance will cover up to the limits as stated below:

	Per	Occurrence	Anı	nual Aggregate]	Deductible
General liability	\$	6,000,000	\$	8,000,000	\$	1,000
Employers liability	\$	6,000,000	\$	6,000,000		N/A
Employee benefits liability	\$	6,000,000	\$	8,000,000		N/A
Law enforcement officers liability	\$	6,000,000	\$	8,000,000	\$	2,500
Public official liability	\$	6,000,000	\$	8,000,000	\$	2,500
Automobile liability	\$	6,000,000		N/A	Comp	rehensive - \$500
					Collis	ion - \$1,000
Cyber liability	\$	1,000,000	\$	1,000,000	\$	25,000
Malicious act liability	\$	1,000,000	\$	1,000,000	\$	25,000

There were no reductions in insurance coverage during the year in any category of risk. Settled claims did not exceed insurance coverage in each of the past three years.

The City pays the State Workers' Compensation System a premium based on salaries paid. The City also provides medical, dental, vision and life insurance to all full-time employees. In 2021, the City paid approximately 90% of

Notes to the Basic Financial Statements For the Year Ended December 31, 2021

NOTE 11 – RISK MANAGEMENT (Continued)

the premiums for medical coverage, approximately 80% of the premiums for dental insurance, and 100% of the premiums for life insurance. The City is self-insured for vision insurance. Vision payments were \$8,978, \$8,821 and \$6,109 for the years ended December 31, 2021, 2020 and 2019, respectively.

NOTE 12 – IMPLEMENTATIONS OF NEW ACCOUNTING PRINCIPLES

For fiscal year 2021, the City implemented Governmental Accounting Standards Board (GASB) Statement No. 89, Accounting for Interest Cost Incurred before the End of a Construction Period and GASB Statement No. 98, The Annual Comprehensive Financial Report.

GASB Statement No. 89 establishes accounting requirements for interest cost incurred before the end of a construction period. Interest costs incurred before the end of a construction period are recognized as an expense in the period in which the cost is incurred for financial statements prepared using the economic resources measurement focus. As a result, interest cost incurred before the end of a construction period will not be included in the historical cost of a capital asset reported in a business-type activity or enterprise fund. In Financial statements prepared using the current financial resources measurement focus, interest cost incurred before the end of a construction period should be recognized as an expenditure on a basis consistent with governmental fund accounting principles.

GASB Statement No. 98 establishes the term *annual comprehensive financial report* and its acronym *ACFR*. That new term and acronym replace instances of *comprehensive annual financial report* and its acronym in generally accepted accounting principles for state and local governments.

Notes to the Required Supplementary Information For the Fiscal Year Ended December 31, 2021

Note 1 – Net Pension Plan Liability

Ohio Public Employees Retirement System Changes in Benefit Terms and Assumptions

Changes in assumptions:

2021-2020: There were no changes in methods and assumptions used in the calculation of actuarial determined contributions for this period.

2019: OPERS Board adopted a change in the investment return assumption, reducing it from 7.50% to 7.20%.

2018: There were no changes in methods and assumptions used in the calculation of actuarial determined contributions.

2017: The following were the most significant changes of assumptions that affected total pension liability since the prior measurement date

- Reduction in actuarial assumed rate of return from 8.00% to 7.50%
- Decrease in wage inflation from 3.75% to 3.25%
- Change in future salary increases from a range of 4.25%-10.02% to 3.25%-10.75%

2016-2014: There were no changes in methods and assumptions used in the calculation of actuarial determined contributions.

Changes in benefit terms:

2021-2014: There were no changes in benefit terms for this period.

Ohio Police and Fire Pension Fund Changes in Benefit Terms and Assumptions

Changes in assumptions:

2021-2019: There have been no OP&F pension plan amendments adopted or changes in assumptions used in the calculation of actuarial determined contributions.

2018: The following were the most significant changes of assumptions that affected total pension liability since the prior measurement date.

- Reduction in actuarial assumed rate of return from 8.25% to 8.00%
- Decrease salary increases from 3.75% to 3.25%
- Change in payroll growth from 3.75% to 3.25%
- Reduce DROP interest rate from 4.5% to 4.0%
- Reduce CPI-based COLA from 2.6% to 2.2%
- Inflation component reduced from 3.25% to 2.75%

2017-2014: There were no changes in methods and assumptions used in the calculation of actuarial determined contributions.

Changes in benefit terms:

2021-2014: There were no changes in benefit terms for the period.

Notes to the Required Supplementary Information For the Fiscal Year Ended December 31, 2021

Note 2 – Net Other Post Employment Benefits (OPEB) Liability / (Asset)

Ohio Public Employees Retirement System Changes in Benefit Terms and Assumptions

Changes in assumptions:

2021: The following were the most significant changes of assumptions that affected the total OPEB liability since the prior measurement date:

- The single discount rate increased from 3.16 percent to 6.00 percent.
- The municipal bond rate decreased from 2.75 percent to 2.00 percent.
- The initial health care cost trend rate decreased from 10.5 percent to 8.5 percent.

2020: The following were the most significant changes of assumptions that affected the total OPEB liability since the prior measurement date:

- The single discount rate decreased from 3.96 percent to 3.16 percent.
- The municipal bond rate decreased from 3.71 percent to 2.75 percent.
- The initial health care cost trend rate increased from 10.0 percent to 10.5 percent.

2019: The following were the most significant changes of assumptions that affected the total OPEB liability since the prior measurement date:

- The single discount rate increased from 3.85 percent to 3.96 percent.
- The investment rate of return decreased from 6.5 percent to 6 percent.
- The municipal bond rate increased from 3.31 percent to 3.71 percent.
- The initial health care cost trend rate increased from 7.5 percent to 10 percent.

2018: The single discount rate changed from 4.23 percent to 3.85 percent.

Changes in Benefit Terms:

2021: There were no changes in benefit terms for the period.

2020: On January 15, 2020, the Board approved several changes to the health care plan offered to Medicare and pre-Medicare retirees in efforts to decrease costs and increase the solvency of the health care plan. These changes are effective January 1, 2022, and include changes to base allowances and eligibility for Medicare retirees, as well as replacing OPERS-sponsored medical plans for pre-Medicare retirees with monthly allowances, similar to the program for Medicare retirees.

2019-2018: There were no changes in benefit terms for the period.

Ohio Police and Fire Pension Fund Changes in Benefit Terms and Assumptions

Changes in assumptions:

2021: There were no changes in methods and assumptions used in the calculation of actuarial determined contributions. The single discount rate changed from 3.56% to 2.96%.

2020: There were no changes in methods and assumptions used in the calculation of actuarial determined contributions. The single discount rate changed from 4.66% to 3.56%.

Notes to the Required Supplementary Information For the Fiscal Year Ended December 31, 2021

Note 2 – Net Other Post Employment Benefits (OPEB) Liability / (Asset) (Continued)

2019: Beginning January 1, 2019 OP&F changed its retiree health care model and the current self-insured health care plan is no longer offered. In its place will be a stipend-based health care model. OP&F has contracted with a vendor who will assist eligible retirees in choosing health care plans from their marketplace (both Medicare-eligible and pre-Medicare populations). A stipend funded by OP&F will be placed in individual Health Reimbursement Accounts that retirees will use to be reimbursed for health care expenses. As a result of changing from the current health care model to the stipend-based health care model, management expects that it will be able to provide stipends to eligible participants for the next 15 years. Beginning in 2020 the Board approved a change to the Deferred Retirement Option Plan. The minimum interest rate accruing will be 2.5%. The single discount rate increased from 3.24% to 4.66% and the municipal bond rate from 3.16% to 4.13%.

2018: The single discount rate changed from 3.79% to 3.24%

Changes in benefit terms:

2021-2020: There were no changes in benefit terms for the period.

2019: See above regarding change to stipend-based model.

2018: There were no changes in benefit terms for the period.

Note 3 – Budgetary Basis of Accounting

While the City is reporting financial position, results of operations, and changes in fund balance on the basis of generally accepted accounting principles (GAAP), the budgetary basis, as provided by law is based upon accounting for certain transactions on the basis of cash receipts, disbursements, and encumbrances. The schedule of revenues, expenditures and changes in fund balances – budget and actual budgetary (non-GAAP) presented for the general fund is presented on the budgetary basis to provide a meaningful comparison of actual results with the budget.

The major differences between the budget basis and GAAP basis are that:

- 1. Revenues are recorded when received in cash (budget basis) as opposed to when susceptible to accrual (GAAP basis).
- 2. Expenditures are recorded when paid in cash (budget basis) as opposed to when the liability is incurred (GAAP basis).
- 3. Outstanding year-end encumbrances are treated as expenditures (budget basis) rather than as an assignment of fund balance for general fund (GAAP basis).

Notes to the Required Supplementary Information For the Fiscal Year Ended December 31, 2021

Note 3 – Budgetary Basis of Accounting (Continued)

- 4. Proceeds from and principal payments on short-term note obligations are reported on the operating statement (budget basis) rather than as balance sheet transactions (GAAP basis).
- 5. The general fund (GAAP basis) includes several funds required to be combined as opposed to the general fund (budget basis) which is just the general fund.

Additionally, all annual appropriations lapse at year-end to the extent they have been expended or lawfully encumbered. The ending fund balances shown are unencumbered cash balances. This basis is utilized for all interim financial statements issued during the year.

Note 4 – Budgetary Process

All funds, except for custodial fiduciary funds, are legally required to be budgeted and appropriated. The major documents prepared are the tax budget, the certificate of estimated resources, and the appropriation resolution, all of which are prepared on the budgetary basis of accounting. The tax budget demonstrates a need for existing or increased tax rates. The certificate of estimated resources establishes a limit on the amount Council may appropriate. The appropriation resolution is Council's authorization to spend resources and sets annual limits on expenditures plus encumbrances at the level of control selected by Council. The legal level of control has been established by Council at the personal services and other expenditures level within each office, department and division within a fund. Council must approve any revisions that alter total fund appropriations.

The certificate of estimated resources may be amended during the year if projected increases or decreases in revenue are identified by the Finance Director. The amounts reported as the original budgeted amounts on the budgetary schedules reflect the amounts on the certificate of estimated resources when the original appropriations were adopted. The amounts reported as the final budgeted amounts on the budgetary schedules reflect the amounts on the amended certificate at the time final appropriations were adopted.

The appropriation resolution is subject to amendment by Council throughout the year with the restriction that appropriations cannot exceed estimated resources. The amounts reported as the original budgeted amounts reflect the first appropriation resolution for that fund that covers the entire year, including amounts automatically carried forward from prior years. The amounts reported as the final budgeted amounts represent the final appropriation amounts passed by Council during the year.

Notes to the Required Supplementary Information For the Fiscal Year Ended December 31, 2021

Note 5 - Reconciliation of Budget Basis to Governmental GAAP Basis

The following table summarizes the adjustments necessary to reconcile the Governmental GAAP basis statements to the budgetary basis statements:

	General Fund	Health Fund
GAAP Basis	\$ 1,811,272	\$ 13,080
Adjustments:		
Other fund balances included in		
governmental GAAP basis	(202,808)	-
Revenue accruals	67,949	(84)
Expenditure accruals	85,388	3,398
Encumbrances	(92,767)	-
Transfers		 -
	_	
Budgetary Basis	\$ 1,669,034	\$ 16,394

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS REQUIRED BY GOVERNMENT AUDITING STANDARDS

Honorable Mayor and the City Council, City of Oakwood, Ohio

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Oakwood, Ohio (the City), as of and for the year ended December 31, 2021, and the related notes to the financial statements, which collectively comprise the City's basic financial statements, and have issued our report thereon dated May 3, 2022.

Report on Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the City's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control. Accordingly, we do not express an opinion on the effectiveness of the City's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that were not identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the City's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of This Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
